

THE ALLIANCE FOR THE UNION OF ROMANIANS
and
THE GRASSROOTS ASSOCIATION

PRESENT

INTERNATIONAL
CRISIS SUMMIT⁴

Bucharest (RO) Nov. 18-19, 2023
PALACE OF THE PARLIAMENT

SPEAKER BIOS AND ABSTRACTS

INTRODUCTION

It has only been six months since the ICS3 in the European Parliament, however, new revelations have come to light at warp speed.

What were once labeled ‘Conspiracy Theories’ are now facts that are openly discussed and accepted as truths. The same details that were constantly categorized as ‘fake news’ are now being broadcast as crucial ‘newly discovered’ findings, often by the same reporters that condemned these truths throughout the pandemic. Data that was viciously censored is now being reported as ‘new ground-breaking information’.

Throughout the pandemic a group of informed and brave professionals fought relentlessly to expose these truths – often losing everything in pursuit of veracity to protect our freedoms. Many of these fearless professionals will unite for the ICS4 in Bucharest, Romania where the population still remembers what it is like to live without freedoms. It is because of their history that many Romanians were able to recognize the violation of human rights that occurred during the pandemic faster and more deeply than the rest of the free world. They banded together and were not swayed by the coercion and restrictions forced upon them.

The ICS4 will bring current data, statistics, and information to Bucharest, Romania, and draw inspiration and knowledge from a country that fought tirelessly for decades against injustice, censorship, and the restriction of human rights...and won. By virtue of their history, Romanians know very well the value of their freedom and quickly recognized the signs when it was being taken away.

It is our belief that by merging current data from the Professionals with the knowledge and experience of Romanians we will create the ideal platform to foster solutions and launch incentives to ensure that we maintain our rights and freedoms. We will discuss strategies to move forward and ensure that we never again fall victim to fear, threats, and misinformation.

It is a true honour for the ICS team to be invited to The Palace of The Parliament in Bucharest, Romania to share information and learn from the experiences of this amazing Country.

NOVEMBER 18, 2023: COVID AND THE PANDEMIC
PALACE OF THE PARLIAMENT – ROSSETTI ROOM
AGENDA

WELCOME FROM THE HONORABLE MEMBERS OF ROMANIAN PARLIAMENT
 MR. GEORGE SIMION • MR. CLAUDIU TÂRZIU • MR. CHRISTIAN TERHES • DR. SORIN MUNCACIU

- MISS. CHRISTINA DUMITRESCU (ROMANIA)** *Welcome From The Romanian Organizational Team*
- DR ROBERT MALONE (USA)** *Welcome from ICS 4 Organizers and Introduction: International Crisis Summit*
- DR. ANDREA STRAMEZZI (ITALY)** *The Medical Restrictions' Hindrance on Science and Consciousness*
- DR. BYRAM BRIDLE (CANADA)** *Censorship Under the Guise of Public Health*
- MR. JASON CHRISTOFF (CANADA)** *Media Over Medicine*
- DR. RENATE HOLZEISEN (ITALY)** *Restricting Our Freedoms and Rights*
- DR. RODICA MALOS (USA/ROMANIA)** *The Effects of Fear, Mandates & Lockdowns*
- DR. DAVID ANDERSON (UK)** *The Power of Vitamin D and Natural Immunity*
- DR. VLADIMIR ZELENKO (USA)** *A Tribute to An Early Warrior and The Lessons He Left Behind*
- DR. PIERRE KORY (USA)** *The Suppression and Censorship of Covid-19 Treatment*
- DR. ANGELICA DUMITRESCU-NOICA (ROMANIA)** *Covid and Vaccine Injury Treatment: Experiences of A Romanian MD*
- DR. MARK TROZZI (CANADA)** *The True Efficacy of Covid-19 Vaccines*
- DR. NATALIA PREGO (SPAIN)** *The Effects of The Covid-19 Vaccine on The Immune System*

LUNCH

- DR. GIUSEPPE BARBARO (ITALY)** *Vaccine-Associated Cardiovascular Complications and Sudden Death*
- DR. ROSANNA CHIFARI (ITALY)** *Neurological Damage from The Covid-19 Vaccine*
- DR. RYAN COLE (USA)** *The Covid-19 Vaccine and Turbo Cancer*
- PROFESSOR GIOVANNI FRAJESE (ITALY)** *The Effects of The Covid-19 Vaccine on Fertility*
- PROFESSOR EMMANUELLE DARLES (FRANCE)** *The Effects of The Covid-19 Vaccine on Pregnancy and Breast Milk*
- DR. DAMIAN BACIU (ROMANIA)** *The Impact of Covid-19 And MRNA Products on The Pediatric Population*
- MR. RAIN TROZZI (CANADA)** *The Impact of Mandates on Young Adults*
- MR. PIETRO STRAMEZZI (RUSSIA)** *The Effects of Propaganda on Young Adults*
- DR JESSICA ROSE (CANADA)** *VAERS Reports of Adverse Events and DNA In The modmRNA COVID-19 Products*
- DR. DENIS RANCOURT (CANADA)** *All-Cause Mortality World-Wide and Romania*
- DR CHRIS SHOEMAKER (CANADA)** *The Truth Is Out: What Do We Do Now?*
- DR. OANA MIHAELA SECARA (ROMANIA)** *Truth Prevails Over Official Data in Romania: Significance and Outcome*
- DR. MARINA-IOANA ALEXANDRU/DR. ADRIAN ACIU (ROMANIA)** *Why Did Romanians Resist the Vaccination Agenda?*

CLOSING STATEMENTS FROM THE HONORABLE MEMBERS OF ROMANIAN PARLIAMENT

INTERNATIONAL COVID SUMMIT ORGANIZERS

A MESSAGE FROM THE INTERNATIONAL COVID SUMMIT ORGANIZERS

The International Covid Summit started as a grassroots movement by a small group of people who wanted answers to the many questions and sought clarity on contradictions surrounding the onset of this 'pandemic'. These warriors questioned the narrative, pushed back the curtain of deception, and bravely searched for one another. This quest for answers and like-minded thinkers led us to each other and proved to us that we are many. It created communities and initiatives internationally that have informed and united us in a world that is trying to keep us confused and separated. These initiatives and our relentless pursuit of truth and justice have saved lives.

It is thanks to the bravery of all those who participated in events like the International Covid Summits that we were able to create our own little crack in the narrative. These historic events blazed trails, triggered global conversations and gave people the courage to ask questions and find the warriors within themselves. Despite the backlash, our numbers keep growing, and all truths are being revealed.

The overwhelming interest and incredible reception of these summits reinforces the conviction that the world is very aware that there is a truth to be heard and they are keen on hearing it. Direct, honest, and bold discussions are critical and in high demand globally.

It has been said that every dark cloud has a silver lining but, in this case, the lining is transparent. They tried to drape themselves in cloaks and daggers only to parade around in the Emperor's new clothes. By closing down the world they opened many eyes.

Therefore, armed with current data and supported by millions of people around the world, we are doing it again and changing the ICS name to the International Crisis Summit because, as we now know, this was never just about Covid.

It is with great honour that we accept this invitation to co-host The ICS4 with the Honorable Members of the Romanian Parliament.

WELCOME FROM THE INTERNATIONAL COVID SUMMIT ORGANIZERS: DR ROBERT MALONE

On behalf of the organizers, it is my pleasure to welcome all of you to the meeting of the Fourth International COVID Summit. I know that many of you have traveled a long distance to attend, while others have come from across Europe and from here in Romania. The organizers thank all of you for your commitment, time and courage to participate, but we particularly wish to thank the members of the Romanian Government who are providing both this beautiful venue and their generous support.

It seems simultaneously just yesterday and also a long time ago that the First International COVID summit was convened in Rome, Italy by invitation from a member of the Senate. So many things have changed since then. At that meeting, attendees were only allowed to speak about drug treatments, not about vaccine risks or effectiveness. This was the first major international meeting where physicians and scientists came together from across the world to compare notes and discuss successful ways to treat COVID and virtually eliminate hospitalization and death with a variety of early treatment protocols.

The Second ICS then followed in France, Marseilles, and Massy, included discussion of masks, lockdowns, treatments as well as vaccine concerns and was also a great success. The Third ICS convened recently at the European Parliament in Brussels, and video from the provided testimony has been viewed billions of times.

With your help and support, I have no doubt that this Fourth ICS will be another step forward in helping both Romania and the world both make sense of what we have all experienced and point the way forward towards a better future for all of us.

DR. ROBERT MALONE

Dr. Robert Malone is an internationally recognized scientist, physician, author, and political commentator. He is the original inventor of mRNA vaccination and DNA vaccination as technology platforms and holds numerous fundamental domestic and foreign patents. He has about 1-- peer-reviewed publications and over 14,000 citations for his work. Dr. Malone has been a thought leader during the COVID era, including bringing attention to the faulty testing and the significant number of adverse events associated with the mRNA vaccines and regulatory capture by the FDA. He has testified against censorship, COVID mandates and for access to early treatment across the world. Dr. Malone is president of the Malone Institute, whose mission is to bring back integrity to government, the biological sciences, and medicine. Dr. Malone's substack, "Who is Robert Malone" has 315,000 subscribers and he is featured on many TV broadcasts, podcasts and documentaries. His best-selling book is called "Lies My Gov't Told Me: And the Better Future Coming".

INTERNATIONAL CRISIS SUMMIT

Current evidence suggests that, beginning at some time in the fourth quarter of 2019, an intentionally molecularly engineered Coronavirus, closely related to SARS-CoV-1, entered the human population in Wuhan, China. Facilitated by international travel patterns including the traditional diaspora associated with the Chinese New Year, this novel Sarbecovirus (a subcategory of Coronavirus) rapidly spread throughout the world, causing a clinical disease later named COVID-19 (CoronaVirus Infectious Disease 2019). When confronted by this virus (which was closely related to the SARS virus) and the associated clinical syndrome, two separate groups began developing alternative responses to reduce the clinical risks, treat the disease and prevent death.

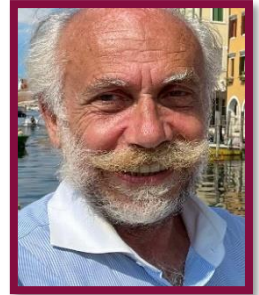

Surprisingly, one group, representing the official international public health community, had participated in planning for just such a coronavirus outbreak (Event 201) at approximately the same time as the virus entered the human population in 2019. This highly centralized planning exercise engaged representatives from Western first-world countries, representatives of large non-governmental organizations, defense and intelligence communities, and corporate media to determine the strategy and tactics that would be advocated and deployed as a global response. The subsequent response based on this "war game" planning was largely led by WHO, UK, EU, and US public health officials acting in close partnership with the Western biopharmaceutical industry. This top-down approach has since become associated with a wide range of ineffective or counterproductive recommendations such as the use of paper particle masks, lockdowns, and rapidly deployed novel experimental drugs and "vaccines". These centralized, globalized responses have also been associated with breaches of established biomedical ethical guidelines, ignoring well-established pharmaceutical regulatory norms, withholding of key safety and effectiveness data, censorship, propaganda, psychological operation methods such as "nudge" and "neurolinguistics programming" techniques, and heavy-handed authoritarian methods for population control.

The other group, composed of front-line physicians, academic epidemiologists, and other allied health professionals mounted a decentralized, pragmatic response based on previously developed, consensus-driven public health norms combined with experience-based knowledge of the COVID-19 clinical syndrome. This group focused on developing a symptom-based treatment approach employing the existing available pharmacopeia, much of which involved generic medicines registered in the WHO essential medicines list. In contrast to the "top-down" approach of the first group, these efforts, activities, and successes represented a decentralized "bottom-up" response. The International COVID Summit meetings have served as one of many forums for the exchange and reporting of information and knowledge developed by this second group.

This Fourth International COVID Summit meeting will provide a report of key findings by members of this second, decentralized group, and will also provide an alternative narrative concerning the COVID crisis; an alternative to the "approved" narrative which has been actively promoted by the coalition of globalists, WHO, "official" western nation leadership and their captured corporate media, the western Biopharmaceutical industry, and their allied intelligence community.

DR. ANDREA STRAMEZZI

After 40 years of clinical research on TMJ-induced pathologies, since 2020 Dr Stramezzi totally dedicated himself to the treatment of Covid in-door and out-door patients and dedicated a lot of time to communicating the clinical results and critical issues of the initiatives of the Health Authorities, both to medical colleagues and citizens.

MEDICAL RESTRICTIONS AND THEIR EFFECTS ON SCIENCE AND CONSCIOUSNESS

After having identified the most important cause of the almost 200,000 Italian deaths from Covid and the collaboration of doctors in the illogical and unscientific vaccination campaign of mRNA gene pro-drugs, which is causing so much mourning and serious adverse events, in systematic contrast to the freedom of the Doctor to cure in Science and Consciousness, the author identifies some worrying initiatives to further block this freedom, enshrined in the Hippocratic Oath:

- The modification of the Code of Ethics, which will lead to the expulsion of a doctor who dares to advise his patient against any vaccine
- The further exaltation of the guidelines, dictated by the health authorities, based on scientific evidence appearing in research papers, both financed by Big Pharma
- Mandatory doctor refresher courses financed and carried out by pharmaceutical companies
- Introduction of courses in schools for Italian children, aged 11 to 18, to indoctrinate them on the goodness of official science, organized by Pfizer
- The total delegation of health interventions and directives of individual States to the WHO, in the event of a pandemic declared by the same
- The continuous increase in the bureaucratization of the doctor's activity
- The establishment of community health homes that eliminate the figure of the Family Doctor and replace him with temporary figures who do not know the patient
- The announced introduction of Artificial Intelligence in Diagnosis and Therapy, which will obviously be implemented with the information given by Big Pharma.

DR. BYRAM BRIDLE

Associate Professor of Viral Immunology with a PhD in immunology and a post-doctorate in viral immunology. He has 82 published peer-reviewed scientific papers. He is highly recognized as a Canadian scientist with expertise in immunology, virology, and cancer biology. His research has focused on developing vaccines to prevent infectious diseases and treat cancers, and studying host immune responses to viruses. Because of his expertise, during the beginning of the COVID-19 outbreak, he received funding from the Government of Ontario and the Government of Canada to develop vaccines against SARS-CoV-2. Dr. Bridle has received prestigious awards for his research and teaching.

Dr Byram Bridle has also received multiple citations as a top-tier reviewer for Canada's national medical research granting agency. He is the Chief Operating Officer for ImmunoCeutica, Inc., which focuses on the research, development, and distribution of immunoceuticals to naturally promote optimal immunological health. He sits on the Scientific and Medical Advisory Committee for the Canadian COVID Care Alliance and has been asked to serve as an expert witness in the areas of immunology and virology for courts throughout the world. Dr. Bridle was the first to warn the public that modified RNA shots could distribute throughout the body where they could potentially cause harm by multiple mechanisms of action.

CENSORSHIP UNDER THE GUISE OF PUBLIC HEALTH

The outbreak of COVID-19 saw the field of so-called 'misinformation' 'science' weaponized to promote censorship of dissenting professionals. Discussions are now occurring around the globe about implementing punishments for professionals deemed to have disseminated 'mis- or disinformation'. Criminalization is even being considered. This begs the question of 'who is to be the arbiter of truth'? The mantra of "follow the science" demands an examination of the principles underpinning 'misinformation science'. Based on the brutal and seemingly biased treatment of genuine experts by 'misinformation gurus', it was hypothesized that pseudoscience dominates this field's knowledge base. However, this proved to be incorrect. There is a robust body of peer-reviewed published literature that provides sound rationales for guidelines to identify and correct potential misinformation. Surprisingly, many of these established guidelines are not put into practice by many 'misinformation experts'. Among the most egregious, is avoidance of the recommendation to engage in public discussions of dissenting viewpoints. A landmark study underpinning 'misinformation science' proved there was no harm in engaging in public discussions, even with 'science deniers'. It showed that concern about 'the backfire effect' has no basis. This is the fear that public discussions with 'misinformation' spreaders might provide a platform and legitimacy that could further spread 'misinformation'. Notably, the opposite conclusion has been drawn in the field; that "those who fail to show up cause the most harm". So, it is bewildering as to why so many people accusing others of propagating 'misinformation' have refused to engage in public discussions. Other contradictions exist between guidelines for 'misinformation experts' and their public behaviours. Disturbingly, 'misinformation science' appears to represent the future of censorship of open discussions of matters of global health. Yet it is being built upon hypocrisies, contradictions, and cowardice.

MR. JASON CHRISTOFF

Jason Christoff runs an international overcoming self-sabotage and psychological reprogramming institute where students are educated on the subjects of mind control, brainwashing, behavior modification, and psychological manipulation. Jason's students then use their knowledge in these areas to help reprogram their clients into better versions of themselves on all levels.

Jason believes that the social decay we openly see in our world today has only come about because key players in our society are using this manipulative psychology against most of humanity. If we are to survive and thrive in the upcoming years Jason believes that each citizen must understand these processes, as to protect themselves from future psychological operations.

MEDIA OVER MEDICINE

This presentation explores the documented behavioral psychology that was weaponized against the public, by the media and government, during the COVID operation. Documented psychological manipulation tactics were interwoven into most government and media announcements during COVID, with the aim of moving the public prematurely toward predetermined outcomes that appeared in contravention to stated public health and safety objectives.

The weaponization of fear was at the forefront in various media and government COVID campaigns, with fear being proven to inhibit higher IQ brain function and to initiate lower IQ reactions that revolve around short-term safety concerns. The end result of such behavior modification tactics was short-term thinking/group behaviors, which for the most part lacked critical analysis and logical review.

Psychological research from Dr. Solomon Asch, Edward Bernays, Dr Joost Meerloo and Dr. Nils Bergerot is highlighted in this presentation, in order to educate the audience within the already accepted conclusions of clinical psychology. The morality and ethics of such tactics are also called into question in this presentation.

DR. RENATE HOLZEISEN

Lawyer and economist based in Italy. She is a barrister practicing also before the Supreme Courts and specialized in European and International Law. Alongside her main activity for companies with economic interests in Italy and the European Union, she was always engaged in issues regarding Fundamental Rights and Freedoms and is now for many years well known for that not only in her homeland South-Tyrol. She stands for transparency, democracy, and the rule of law also as a basis for a healthy and stable economy. She points out skewed power relations and political abuse and, if necessary, taking legal action against them. Since March 2020 she became more and more aware that something was and is going absolutely wrong worldwide and therefore she began to stand up for the guarantee of Fundamental Rights and Freedoms together with other lawyers, with special attention to the children. As a consequence, she is now a member of the board of Children's Health Defense Europe. Currently, her efforts are particularly concentrated in pointing out the brutal breach by the EMA and European Commission of the still-in-force European medicinal law in the authorization procedures of the so-called Covid-19-“vaccines”, as well as the currently ongoing total revision of the European medicinal law which annuls definitely the guarantees for life and health of the EU citizen. She is also engaged in informing about the current implementation in advance by the EU of the transfer of sovereignty from the EU member states to the WHO. She filed in February in the European Court two actions for annulment of the market-authorization by the European Commission of the two mRNA-substances Comirnaty of Pfizer/BioNTech and Spikevax of Moderna, which are currently on the market without any condition also for the children. The two court proceedings are pending with the procedural number T-108/23 and T-109/23 at the European Court.

RESTRICTING OUR FREEDOMS AND RIGHTS

I. The planned modification of the IHR and the new Pandemic Treaty General considerations.

- The definitive end of democracy and liberty.

II. Implementation in advance by the EU of the obligation to support the modification of the IHR and the new Pandemic Treaty - European Union Global Health Strategy

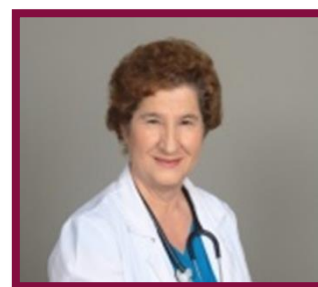

- HERA – activity ultra vires since 2021
- Vaccination declared as the most important tool of Public Health measures – the obligation of the EU member states to combat– with all tools – vaccine hesitancy
- Manipulation of the citizens and general censorship of so-called “disinformation” in collaboration with the education sector, social partners, and the media
- Obligation of the EU Member States to join the Global Digital Health Certification Network of the WHO
- Regulation (EU) 2022/2371 of the Parliament and the Council of 23 November 2022 and Regulation (EU) 2022/2372 of the Parliament and the Council of 24 October 2022
- Climate issues are treated as issues of Public Health which gives the possibility to include every political decision, especially those regarding the economic policy
- Council Recommendation (EU)2023/1339 of 27 June 2023 on joining the global digital health certification network established by the WHO already by December 31st 2023.
- EU citizen are in a particular risk of seeing their human rights annulled
- The Parliamentarians of the National Parliaments have to act immediately in order to stop this dystopian development otherwise also they commit an attack on the constitution of their member state.

III. Complete revision of the European Pharmaceutical Law in course

EMA and the EU Commission in the last nearly four years already committed a criminal violation of the EU pharmaceutical legislation, by bypassing the legislation for the so-called advanced therapy medicinal products, defining experimental gene-based substances simply as “vaccines” and putting them on the market for the use in mass vaccination programs for which the European Commission is pushing. Now the intention of the EU Commission is to cancel all the regulation which was foreseen in a time when the European Legislator was not completely in the hand of the pharmaceutical industry or whomever and tried really to guarantee the citizen's fundamental right to life and health.

DR. RODICA MALOS

Dr. Rodica Malos, DNP arrived in the USA in 1990 where she earned her degrees, including a Doctor of Nursing Practice (DNP), a Ph.D degree with clinical orientation and focus on Metabolic Syndrome (Hypertension, Diabetes, Dyslipidemia) in Primary Care Practice from Oregon Health & Science University (OHSU) Portland, Oregon. She received clinical training (2007-2009) at the Endocrinology Division, OHSU, Cardiology Consult Lake Oswego, St Vincent's Medical Center, Portland, OR. and Master's Degree program (1999-2001) with training in Internal Medicine and Urgent Care Kaiser Permanente in Clackamas, OR., General Medicine Primary Care, VAMC, Portland, OR. As ANP and GNP with Prescriptive Authority and DEA certificate, she practiced general medicine for more than 20 years providing care to minorities, marginalized, homeless, and needy people volunteering for more than 10,000 hours in two Community Health Clinics in Portland Oregon. During the pandemic time, Dr. Malos treated hundreds of patients suffering from Covid saving lives with early interventions using safe, well-known medications proven cost-effective for the patients. She also earned her Bachelor of Science (Nursing) in 1999 - OHSU and Bachelor of Economic Sciences in 1986 at The Academy of Economic Sciences in Bucharest, Romania, Europe. She is the founder and operator of two Memory Care facilities where she provided physical, emotional, and spiritual care (including comfort care at the end of life) to patients with multiple chronic conditions for more than 30 years, She is a Board Member at Star of Hope USA, and supports children with disabilities and their families financially, emotionally and spiritually. She, also, wrote three books: Find Your Peace, Created In His Image with Unique Purpose, Covid-19, Post Covid-19, Alleviate the Fear available at www.rodicamalos.com.

THE EFFECTS OF FEAR, MANDATES AND LOCKDOWNS

Lockdown consequences, isolation, and mandates increased more fear and panic stirred by the “invisible enemy” COVID-19, affecting people’s minds, soul, and bodies. Czeisler, Lane, Petrosky, et. al. demonstrated that “the coronavirus disease 2019 (COVID-19) pandemic has been associated with mental health challenges related to the morbidity and mortality caused by the disease and to mitigation activities, including the impact of physical distancing and stay-at-home orders”. Mary Van Beusekom stated that “COVID-19 has tripled the rate of depression in US” according to a study published in JAMA Network Open.” Fear and stress became the real pandemic in the world. “75–90% of doctor visits are related to stress” Dr. Joseph Goldberg, MD. In primary care settings, patients were being sent home to “sit” on a “deadly virus” to fight off the viral infection with no early therapy—to return only when in severe respiratory distress; many came to the hospital too late like my friend, Mary 52 y.o. She was a healthy Romanian woman, she went to the emergency room with symptoms from Covid and was refused early treatment by doctors who advised her to come back only when symptoms got worse. Two weeks later she went to the hospital as she was advised but was told by doctors “you came too late” and she died in the hospital two days later. Her passing was devastating for her family and for the entire Romanian community. Her case stirred deep compassion in my heart and made me feel very uncomfortable with “doing nothing” approach in primary care for patients suffering from symptoms from a “deadly virus”. So I started to educate myself from true doctors and experts in the world and saved hundreds of lives with early treatment and shared the protocol with thousands around the world. Countless patients around the world died in the same way as Mary due to health authorities’ negligence in promoting early interventions with off-label, safe medications that are cost-effective to save lives. People are still grieving for the loved ones who passed unnecessarily. Frontline brave doctors who saved thousands and thousands of lives faced criticism, threatened with professional sanctions and license revocation; but millions of lives have been saved because of their humanistic actions and willingness to share their knowledge, expertise, and experience.

Standing up for the TRUTH is the highest honor on this planet and to fight for freedom for our families and the next generations. “For God hath not given us the spirit of fear; but of power, and of love, and of a sound mind.” 2 Timothy 1:7 kjv

PROFESSOR DAVID ANDERSON

A retired Doctor and former Professor of Medicine in Manchester and Hong Kong, now aged 82, was a renowned international endocrinologist. He qualified in Medicine in 1963 in Dundee, with commendation and as top prizewinner. He has long been interested in Vitamin D, first as a hormone controlling blood calcium, and then as a basic local factor essential for controlling 3% of our genome, including natural immunity for fighting outside attack by micro-organisms. Now retired in Italy, he awoke from academic slumber at the outbreak of Covid-19, when he saw the extent to which the virus was dependent on the global deficiency of the 'sunshine vitamin', D3. He is horrified at the extent of global corruption in mainstream Medicine since its take-over by Big Pharma; and by the simplistic Gatesian model of infinite vaccinations for profits for the super-rich, which if unchecked he fears will lead to the destruction of mankind. He believes this will happen unless enough people come to realize that the virus and its attendant toxic killer pseudo-vaccines are synthetic bioweapons foisted on us by a global cabal of ignorant but ultra-rich psychopaths. The evidence for this and much more is presented and illustrated in this book. Professor Anderson advocates a unique alternative to the profit-driven 'Great Reset' of Klaus Schwab and his World Economic Forum. Instead, he argues for a worldwide 'Great Biology Reset' that reinstates Natural Immunity, with Vitamin D3 centre stage. He argues that Big Pharma's psychopaths know that such a policy would sound their death knell.

THE POWER OF VITAMIN D AND NATURAL IMMUNITY

The artificial synthesis of patented coronaviruses and Nucleic acid pseudo vaccines has opened up a whole new chapter in the history of psychopathic Crimes Against Humanity, in which exploitation of almost universal Vitamin D deficiency, with consequent defective natural immunity, continues to be central. I shall illustrate how Vitamin D3 is a uniquely flexible sterol. formed by the action of UVB radiation from the sun on the skin, to cleave the B-ring of 7-dehydrocholesterol. The molecule opens up to form D3, which travels to the liver where a second hydroxyl is added in the 25-position to form the reservoir form, calcifediol. This circulates bound to a high-affinity D-binding protein. The active form of D3, calcitriol, is formed from calcifediol in a wide range of cells by another enzyme, 1-alpha-hydroxylase. Calcitriol acts through a specific high-affinity receptor (VDR) in two distinct ways that exploit its unique flexibility; rapid effects are exerted by the cis (folded) form binding alone to complex cell-surface structures called 'caveolae'. Genetic effects in the cell nucleus on the other hand involve the extended (trans) form of calcitriol, binding to another binding site of the VDR, and acting in concert with the activated vitamin A (retinol) receptor (RXR). Both actions also involve zinc (through so-called zinc fingers). The latter action controls 3% of our genome, including a host of local effects that allow our immune cells to distinguish and destroy infectious agents, as well as any cells with damaged or defective DNA (potential cancer cells). The 'greediest' function is its action as a calcium-controlling hormone, made in the kidneys and traveling in the bloodstream to act on VDR in the gut and bone cells to promote calcium transport; this is controlled by the parathyroid gland hormone PTH.

The underlying science is outlined in our book entitled 'Vitamin D3 and the Great Biology Reset' written with Dr David Grimes, (www.dgreatbiologyreset.com). We explain how Big Pharma is absolutely dependent on sustaining D-deficiency, for its business model of patented drugs and pseudo-vaccines, a process that combines well with declared ambitions by the mega-rich to reduce global population, through Orwellian lies, fear, censorship, and eternal (bio)warfare. We argue that the response must involve the International Criminal Court holding individuals responsible for creating and exploiting bioweapons. It must also restore natural immunity centre stage with universal availability of and education in the (completely safe) use of the various and inexpensive forms of Vitamin D3. We strongly advocate the formation of a Federation of non-profit global Natural Immunity Foundations, to restore natural biology centre stage. Big Pharma, Big Money and the WEF, I confidently predict, will fight this tooth and nail.

DR. PIERRE KORY

Pierre Kory is the former Chief of the Critical Care Service and Medical Director of the Trauma and Life Support Center at the University of Wisconsin. He is considered one of the world pioneers in the use of ultrasound by physicians in the diagnosis and treatment of critically ill patients.

Dr. Kory was also one of the U.S. pioneers in the research, development, and teaching of performing therapeutic hypothermia to treat post-cardiac arrest patients. Known as a Master Educator, Dr. Kory has won numerous departmental and divisional teaching awards in every hospital where he has worked. In collaboration with Dr. Paul Marik, Dr. Kory helped lead the research and treatment of septic shock patients with high doses of intravenous ascorbic acid.

Dr. Kory has led ICUs in multiple COVID-19 hotspots throughout the pandemic. He has co-authored over 10 influential papers on COVID-19, with the most impactful being a paper that was the first to support the diagnosis of early COVID-19 respiratory disease as an organizing pneumonia, thus explaining the critical response of the disease to corticosteroids.

Dr. Kory is also a co-founder and Chief Medical Officer of the Front-Line Covid-19 Critical Care Alliance (FLCCC). The FLCCC Alliance was organized in March 2020 by a group of highly published, world-renowned Critical Care physicians/scholars – with the academic support of allied physicians from around the world – to research and develop lifesaving protocols for the prevention and treatment of COVID-19 in all stages of illness. Their MATH+ Hospital Treatment Protocol – introduced in March 2020, has saved thousands of patients who were critically ill with COVID-19. Later, they created the CARE+ Prophylaxis and Early At-Home Outpatient Treatment Protocol with Ivermectin.

For more information: <https://covid19criticalcare.com/>.

THE SUPPRESSION AND CENSORSHIP OF COVID-19 TREATMENT

During COVID, many repurposed, off-patent, inexpensive medicines and therapies were used and studied as a treatment for the disease. With rare exceptions, every repurposed drug was found to have “insufficient evidence for use” by health agencies among the advanced health economies across the world while expensive, patented, novel pharmaceutical industry products were consistently approved for use. Using the case of ivermectin as an example, Dr. Kory will detail how the evidence of efficacy for this medicine was systematically distorted and suppressed by medical journals, media, and health agencies using a Disinformation campaign relying on tactics described in the article that is named “The Disinformation Playbook” which can be found here: <https://www.ucsusa.org/resources/disinformation-playbook>.

DR. ANGELICA-CORNELIA DUMITRESCU-NOICA

- Family doctor since 2004
- Carol Davila University of Medicine Bucharest, graduated in 1994
- Advisor on health promotion issues within the Health Promotion Directorate of the Ministry of Health 1998-2001
- Secondary specialisation in Acupuncture (2001),
- Homeopathy(2003),
- Api-Phyto-Aromatherapy(2021)

COVID AND VACCINE INJURY TREATMENT: EXPERIENCES OF A ROMANIAN MD

In this paper, I share the experience I have had and continue to have in treating infectious diseases, with reference to the recent Sars-cov-2 virus pandemic. I analyzed the global and Romanian Sars-cov-2 virus pandemic and compared it to the situation in my practice. I found that these situations were similar, with two major annual waves in the months of September-November and January-March, typical for any viral epidemic. The percentage of illnesses per wave did not exceed 15-20% of the total number of patients on my list. The mortality during the pandemic did not exceed 2%, the recovery rate being generally very high, over 98%. However, the mortality rate and spontaneous abortions began to increase after 2022.

I present my treatment plan for infectious diseases, primarily the one used during the Sars-cov-2 pandemic, which helped me keep my patients alive and recover very quickly. I present a plan to prevent the long-term effects of the covid disease and of the covid vaccines. I also present a comparative study of the effect of antibiotics and of homeopathic nosodes on certain germs, a study carried out in a microbiology laboratory.

In conclusion, I observed that:

- Patients who followed my plan recovered much faster (in 2-3 days) than those who did not;
- Patients who previously had high blood pressure or heart disease had major fluctuations in blood pressure and heart rate during covid disease and even more after the covid vaccines;
- The risk and number of cases of post-pandemic diabetes increased
- Faster progression of cancers or tumors in people previously suffering from such conditions
- An increase in the abortion rate.
- A weakening of memory and concentration in patients.
- Premature aging.
- Sudden deaths post-vaccination or post-infection.

DR. MARK TROZZI

Mark Trozzi MD is a veteran Canadian emergency physician, and a critical resuscitation and trauma medicine instructor. He has held teaching positions in three Canadian medical schools. On duty in multiple emergency departments at the launch of Covid including one designated specifically for Covid; Dr Trozzi identified the global Covid agenda as unethical and unscientific.

At the end of 2020, he walked away from all his positions and income; and committed himself completely to alerting the public, helping advance genuine medical science, and supporting the drive for justice, as well as the return of human rights and the rule of law.

Dr Trozzi is a member of the Steering Committee for the World Council for Health; he has served on the WCH Law and Activism Committee, is an active member and former chair of the WCH Health & Science Committee.

He is one of the medical directors of The Wellness Company and serves as a Consultant and Medical Advisor to various health and human rights organizations including Take Action Canada (www.takeactioncanada.ca), Justice for the Vaccinated (www.vaxjustice.org), Vaccine Choice Canada (www.vaccinechoicecanada.com), Police on Guard (<https://policeonguard.ca/>), and the South Africa Vaccine Adverse Events Reporting System (SAVAERS (<https://savaers.co.za/>)).

He is a member of the Canada Health Alliance (<https://canadahealthalliance.org/>) and the Canadian Covid Care Alliance (www.canadiancovidcarealliance.org); as well as one of the coauthors of the Declaration of Canadian Physicians for Science and Truth

<https://canadianphysicians.org/>.

THE TRUE EFFICACY OF COVID-19 VACCINES

Covid-19 experimental genetic injections have been referred to as "safe and effective vaccines" though they do not satisfy that definition or those claims. They are physically not like any vaccine ever administered before. They do not block infection. They do not block transmission. They were predictably a failure and should not have been administered at all.

The manufacturer's clinical trials were inadequate, flawed, and fraudulent. Efficacy claims to the public were deceptive. Real-world data clearly demonstrates that in addition to causing unprecedented adverse events and death by multiple mechanisms, these injections ultimately increase one's risk of Covid-19 disease; with more injections rendering progressively higher risk.

DR. NATALIA PREGO

- Graduated from Medical School and Surgery from the University of Santiago de Compostela (Spain)
- Specialty in Family and Community Medicine graduated in Coimbra (Portugal)
- Expert in Phytotherapy and Nutrition from Spain University UNED
- Medical practitioner for 25 years
- ER doctor for more than 10 years
- Medical practitioner of a health center in Portugal, for more than 4 years
- Private medicine in Spain and Portugal
- Author of the book "Accepting the Healing Challenge" in 2018
- Co-founder of "Médicos por la Verdad" (Doctors for Truth) in July 2020, a medical group of physicians present in more than 20 countries around the world

Currently devoted to researching Covid-19, the treatment of those affected by Covid19 vaccines, and the widespread of scientific and medical information as a lecturer throughout Europe.

THE EFFECTS OF THE COVID-19 VACCINE ON THE IMMUNE SYSTEM

- The COVID-19 vaccines aim to give a genetic order to the body so that it synthesizes the spike protein at an endogenous level and subsequently produces antibodies against the spike protein
- Our studies conclude that these COVID-19 vaccines are neither safe nor effective
- They do not prevent disease transmission and can seriously affect the immune system, producing immunodeficiency and autoimmunity
- Immunodeficiency causes recurrent infections resistant to antibiotics and conventional treatment
- Among the most probable causes of this immunodeficiency are plasmid contaminations, lymphopenia due to lymphocyte overload, and induced suppression of type I interferon
- On the other hand, the autoimmunity produced by the Covid-19 vaccines is caused by the molecular mimicry of the spike protein with endogenous body proteins, in 28 locations specifically
- This molecular mimicry causes cross-immune interaction and attack of antibodies against spike protein on healthy proteins in the body
- This triggers cardiac pathologies such as myopericarditis, thyroid pathologies, such as autoimmune thyroiditis, autoimmune hepatitis, neurological pathologies such as multiple sclerosis, and potentially lethal pathologies such as thrombotic thrombocytopenia induced by Covid19 vaccines

DR. GIUSEPPE BARBARO

Giuseppe Barbaro is specialist in Internal Medicine and in Cardiology and Chief of Cardiology Section and Echocardiography, Department of Medical Pathophysiology, University of Rome "La Sapienza". He is an active member of several National and International Societies of Internal Medicine and Cardiology and the author of more than 200 scientific publications and four books on cardiovascular complications of HIV disease (h index=56). Current field of clinical investigation regards the study of new markers of visceral obesity (epicardial fat) in HIV-infected subjects with lipodystrophy syndrome as well as in HIV-uninfected subjects with obesity and metabolic syndrome.

VACCINE-ASSOCIATED CARDIOVASCULAR COMPLICATIONS AND SUDDEN DEATH

- Increased blood pressure (average increase of 15-20% in 25-30% of vaccinated subjects) due to blockade of the ACE-2 receptor and reduced inactivation of angiotensin II and the angiotensin II/angiotensin ratio 1.7.
- Acute myocarditis (including the direct endomyocardial action of the vaccine spike protein and reactivation of endogenous infections by cardiotropic viruses such as EBV and CMV in the context of VAIDS). Subclinical myocarditis may result in a fibrous scar which represents a condition of electrical instability capable of evoking fatal ventricular arrhythmias under conditions associated with increased catecholamine levels (e.g. sporting activity).
- Increased adrenergic activity related to the chronic inflammatory state within the increased risk of tachyarrhythmic manifestations especially in subjects with abnormal re-entry pathways or ventricular pre-excitation syndrome (WPW) or in subjects with structural (hypertrophic cardiomyopathy, right ventricular arrhythmogenic dysplasia) or non-structural arrhythmogenic (s.Brugada,s.Long QT) cardiomyopathy.
- Direct activation by the spike protein of the anticoagulant protein S and platelets inducing, also by different mechanisms depending on the type of vaccine administered, thrombocytopenic thrombosis and related cardiovascular complications (haemorrhagic manifestations, cerebral strokes, myocardial ischaemia) with prevalent involvement of the microcirculation.
- The specific action of the spike protein on the vascular endothelium and the development of anti-endothelium antibodies (Gundry,Circulation 2021), is responsible for 11% to 25% acute coronary events and myopericarditis (direct and/or immune-mediated effect on myocardial tissue) with a 25% increase in access to the Emergency Department for cardiac problems in vaccinated subjects under 40 years of age, as reported in Israel.
- Systemic inflammation induced by the spike protein can cause stress cardiomyopathy (takotsubo syndrome) due to activation of the adrenergic system (and hyperactivity of the subepicardial small vessels) and the haemocoagulative system. Activation of the adrenergic system and increased catecholamine levels is also responsible for catecholaminergic myocarditis (with contraction band myocardial necrosis).
- Neuropathy of small nerve fibers (either immune-mediated or due to ischaemia of the vasa nervorum) due to involvement of the autonomic nervous system with associated alterations in heart rate and blood pressure (absence of phasic respiratory variability of heart rate, tachyarrhythmia and/or bradyarrhythmia up to sinoatrial block and asystole). Mutations in specific genes (e.g. SNC5A) are also associated with fatal arrhythmic manifestations and antibodies to alpha/beta receptors.

DR. ROSANNA CHIFARI

Associate Dr. Rosanna Chifari has authored more than 70 scientific papers and abstracts and is an Invited speaker at international congresses. She has been an Invited member of the Health Care Advisory Board since 2008. She won a research grant from the University of Milan in 2002- 2005 for the project: « Individuation of drug - resistance criteria and molecular markers of epileptogenicity in TS patients », and at the same time she received, from the Italian League against Epilepsy, in 2001 and 2003 the award for the best scientific contribution to research project of young researchers for the work « Mild generalized epilepsy and developmental disorder associated with large inv dup(15) », and for the work « The effect of antiepileptic drugs on bone density »(2003). Dr. Chifari was a consultant for the Health Care Commission of the Senate of the Italian Republic under the leadership of Senator A. Tomassini.

From June 2006 until May 2011, she was in charge of an outpatient Epilepsy clinic for adults at Fatebenefratelli Hospital in Milan, Italy. Since June 2011, she has been running his own practice for neurological patients, maintaining a keen interest in Epilepsy and collaborating with numerous institutions including the Health Commission of the Senate of the Italian Republic. Her contribution to public health then peaked when during the COVID-19 pandemic, Dr. Chifari dedicated herself to the home care of patients, eventually taking in up to 800 patients through the Association Ippocrateorg, and succeeding in establishing a home treatment protocol later adopted by physicians nationally and internationally. Collaterally from 2000 to present she has organized numerous fundraising events for NGOs and humanitarian organizations, contributing to the realization of projects in Italy, Madagascar, Rwanda, Bolivia, and other countries around the world.

In 2023 she was awarded in Italy with Premio De Donno and Premio Santa Caterina da Siena and in Florida with Buona Densò, all for medical merits during the pandemic.

NEUROLOGICAL DAMAGE FROM THE COVID-19 VACCINE

Prion disease is a collection of neurodegenerative diseases that are induced through the misfolding of bodily protein, which form, toxic oligomers that eventually precipitate out as fibrils causing widespread damage to neurons. Many degenerative neurodisease, including Alzheimer 's disease, Parkinson's disease, ALS (amyotrophic lateral sclerosis, and Multiple Sclerosis may be prion disease, and researchers have identified specific infectious particles linked to these diseases.

Further researchers have identified a signature motif linked to the susceptibility to misfolding into toxic oligomers, called glycine zipper motif. If we consider that SARS-COV-2 spike protein is a transmembrane protein, and it contains five glycine zipper motifs it became plausible that it could behave as a prion. Here we show a case series who develop a wide range of prionic diseases after shots with mRNA vaccines. It became plausible that spike protein is able to induce the misfolding of bodily proteins in their prion form generating misfolded brain proteins that lead ultimately to neurodegeneration in previously healthy patients.

DR. RYAN COLE

Dr. Ryan Cole is the founder, CEO and medical director of Cole Diagnostics, an independent anatomic and clinical laboratory that served patients of Idaho and across the nation for nearly 20 years with expert pathology diagnoses and laboratory testing. He has helped perform and diagnose over 150,000 Covid tests during the pandemic and has diagnosed 500,000 patients in his career. Dr. Cole completed his residency in Anatomic and Clinical Pathology at the Mayo Clinic, where he was chief fellow during his surgical pathology fellowship, followed by a year as chief fellow at the Ackerman Academy of Dermatopathology in New York City, under the direction of world-renowned dermatopathologist, the late A. Bernard Ackerman. He has spoken in the US Senate and multiple state legislatures, as well as at numerous local, national, and international conferences, sharing the science and truth about COVID, treatments and vaccination, and medical freedom. Cole Diagnostics now serves as a consultation practice to help answer pressing questions related to the long-term effects of COVID and vaccination. When not focused on science, he enjoys working with his family on his organic farm, saw-milling local urban timber, and building one-of-a-kind pieces of functional wood art.

THE COVID-19 VACCINE AND ‘TURBO CANCER’

Countless studies indicate that the synthetic mRNA injections depress the immune system, causing weakening and unprecedented reprogramming of cellular pathways necessary to fight cancer and other disease processes. Appropriate testing for mutation potential of synthetic mRNA was not carried out by international regulatory agencies. Since the roll out of these experimental/investigational products, there has been a concerning uptick of cancer rates and a change of their behavior, now colloquially referred to as “turbo cancers.” These unexpected “turbo cancers” are not following historically, previously understood natural progression. Data also indicates that since the roll out of the synthetic mRNA injections, there has been a surge of cancers across all age groups, but most concerning, in young, previously healthy individuals. Additionally, oncologists and other physicians are reporting cancer recurrence in patients who were in remission, with observed increased sudden and aggressive disease behavior, with resistance to traditionally effective therapies. The coded spike protein is known to bind to several families of cancer genes. A compounding variable is the more recent understanding that the synthetic mRNA vials are contaminated with fragmented plasmid DNA from a bait and switch manufacturing process. DNA wrapped in lipid nanoparticles have potential for genome integration and gene mutation. The worldwide increase of “turbo cancer” patterns demands additional research funding for the countless who have been harmed, health agency database reviews and the immediate halt of these contaminated synthetic mRNA products.

PROFESSOR GIOVANNI FRAJESE

Professor Giovanni V. Frajese is currently an Associate Professor in “Applied Medical Technical Sciences” at the “University of Rome Foro Italico”, and researches medicine and biotechnologies with an interest in the field of Endocrinology, Oncology, Metabolism, and Nutrition. He graduated in 1996 in Medicine at the University of Rome “Tor Vergata” and specialized in Endocrinology and Dysmetabolic diseases in 2001. After spending several years in London (Prof.G.M.Besser Saint Bartholomew’s Hospital) and Quebec City (Prof. Fernand Labrie CHUL, Quebec, Canada) returned to Italy first as a Researcher at the University of Rome “Tor Vergata”, then as Associate Professor at the University of Cassino and Southern Lazio, before occupying his current position. Invited guest and speaker in many international medical symposiums, has authored over 70 papers in international peer-reviewed science journals. Member of several societies including the Endocrine Society (USA), American Diabetes Association (ADA), N.Y. Academy of Sciences, SIE (Italian Society of Endocrinology). Prof. Frajese is part of the Scientific Council for the WFO-OMA of which he was coordinator until 2021.

THE EFFECTS OF THE COVID-19 VACCINE ON FERTILITY

Novel vaccines in lipid nanoparticles differ greatly from any other previous form of vaccine, both because of their size and the genetic material (DNA/RNA) utilized. Arbitrarily naming these products as vaccines, instead of understanding their role as pro-drugs has led to numerous wrong assumptions and missing crucial data, such as biodistribution, pharmacokinetics, pharmacodynamics, gene toxicity, and carcinogenicity. A possible involvement with the ovaries was detected from the original trials in mouse models, as shown in TGA-released data, the injection does not remain in the muscle as it was declared, but it travels in many different places. Suspicion of the interaction of these vaccines with the menstrual cycle, hence human reproduction, was detected early by an Italian study and then confirmed by a multitude of publications worldwide. Symptoms most described in a meta-analysis indicate that menorrhagia, oligomenorrhea, and polymenorrhea were the most common menstrual irregularities after vaccination. Interactions with the reproductive system were not thought possible, but it is a common occurrence, and it is troubling considering the lack of pharmaceutical studies already mentioned. Furthermore, recent statements from a number of researchers warn of likely contamination of the batches with plasmid DNA in unacceptable conditions. The combination of interaction with our genes and the clear involvement with the human reproduction system is a flashing red light that not many are understanding, further research is mandatory, and the use of these products should be immediately suspended.

PROFESSOR EMMANUELLE DARLES

- Emmanuelle Darles is Assistant Professor (PhD) in computer science in a french university.
- A former expert at the European Commission, for the past 3 years she has been working within the Independent Scientific Council (CSI) in France to alert the public to the deleterious effects of ontCovid mRNA injections.
- Independent medical practice at "Consult Pediatric SRL".

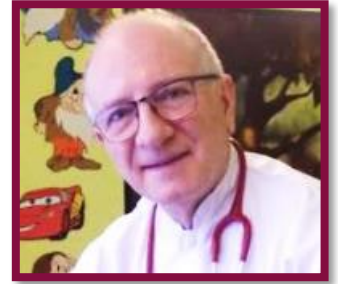

THE EFFECTS OF THE COVID-19 VACCINE ON PREGNANCY AND NEWBORNS

This presentation aims to highlight the effects of mRNA injections on pregnant women and newborns. Following an analysis of the frequency of serious adverse events in this population from the official VAERS and EMA databases, we will analyze the evolution of pre-and post-natal mortality from official French data from the administrative database of hospital centers.

DR. DAMIAN BACIU

- Pediatrician since 1977, IMF Târgu-Mureş.
- Specialization in Pediatrics 1986 Univ. Carol Davila-Bucuresti.
- 1993-2004 cycle 3 medical studies University René Descartes-Paris 5, Pierre et Marie Curie-Paris 6, Montpellier 1. 2003 DIU Vaccinology Paris 5.
- Independent medical practice at "Consult Pediatric SRL".

THE IMPACT OF COVID-19 AND MRNA PRODUCTS ON THE PEDIATRIC POPULATION

The impact of the first biological weapon, SarsCov-2, used on a planetary scale, had minimal effect on the pediatric population. Epidemiological and clinical data, along with paraclinical investigations support this reality.

The second bioweapon used since 2021, messenger RNA products, with a 20-year history of clinical trial failures, constituted a massive attack on the health and lives of children. We already know the short-term effects, glimpse the medium-term ones, and worry about the long-term effects.

MR. RAIN TROZZI

Rain Trozzi is the founder of Over to the Youth (overtotheyouth.com); a large youth community of conscious individuals. After working full time in the field of human rights advocacy since early 2021 with his father Dr. Mark Trozzi (drtrozzi.org), in response to coronavirus mandates, censorship of ethical doctors and scientists, and state-funded misinformation in Canada, he felt called to create an organization to provide a strong solution to the isolation of free-thinking youth in the modern age. Rain continues to be an integral part of both these pursuits to this day.

As an advocate of digital privacy, Rain joined the Above Agency (abovephone.com) in mid-2023 under CEO Ramiro Romani, and is proud to be part of the first company offering a full, robust, and convenient alternative to privacy-compromising smartphone software. Rain works with customers on a one-on-one basis to aid them as they climb out of the walled garden of Big Tech's technological monopoly.

THE IMPACT OF MANDATES ON YOUNG ADULTS

Over to the Youth has become a bastion and network for those who strive to inexcusably get good, and leave the places and people along their path better off than they found them. Rain Trozzi's direct involvement in this community has given him a broad contextual understanding of how the Covid mandates affected his peers around the world.

"Three years ago, Covid mandates were activated in a manner of global lockstep. Lockdowns, mask-wearing, social distancing and the shift to online work and education changed our lives suddenly and dramatically. This was especially difficult for those of us transitioning into early adulthood - trying to build a career and navigate an already complicated socioeconomic landscape. Covid was traumatizing. The scars of our shared experience remain, but we are not addicted to victimhood. We are building ourselves up into integral, competent and empathetic young men and women; preparing to fill the upcoming vacuum of leadership, and motivated by full awareness that we are next in line." - Rain Trozzi

Rain has travelled from Canada to share testimonies from members of his community; adding context of lived experiences to the facts and figures presented throughout the ICS. These stories begin at the advent of the Covid-19 era approximately three years ago.

MR. PIETRO STRAMEZZI

Half Italian and half Russian born in Milan on the 21st of December 2001. After having earned an International Baccalaureate Diploma with a thesis on the History of the Spanish Civil War, I started studying International Relations and Global Affairs at the Catholic University of the Sacred Heart in Milan and will graduate in 2024. I am the President of Milan's Peripheral Committee of the Comitato Fermare la Guerra, and member of the committee's Permanent Commission on Geopolitics and Defense. I am the Head of the Youth-Wing of the International Cultural Organization Aristorcrazia Europea. I write and publish newspaper articles for Il Giornale d'Italia on the Russo-Ucrainian war and publish news about what is happening around the world on my social media. I was an Intern at Oxford Economics and at the World Trade Point Federal on in collaboration with the United Nations Conference on Trade and Development. I was a volunteer of the Italian Rescue Corps of the Order of Malta. I fluently speak Italian, English, Russian, French and I'm studying German. I lived the COVID-19 Crisis in first person by assisting my father, a Covid doctor, in visiting covid patients home by home. I participated in all International Covid Summits and felt on my own skin countless discriminations for critically thinking by myself, with my own opinions and making my own choices, without kneeling to the power of the corrupt institutions and greedy sinister multinational corporations at the cost of punishment and ostracization. As a fervent Christian, my mission is to free the world of evil by searching for and spreading truth.

THE EFFECTS OF PROPAGANDA ON YOUNG ADULTS

My speech will explore a variety of themes, mainly Covid and the vaccination mandates, but also touch on other topics which will explain how and why propaganda dangerously divided families, friends, and entire groups at a societal level, creating a new majoritarian caste of corrupt youth who will grow up in a new indoctrinated generation characterized by the constant feeling of fear, hate, solitude, meaninglessness and division, without the capacity to think critically, which will increase their submission and trust towards the mainstream controlled thought.

I will explain the importance of developing a strong critical mind, of forming strong bonds with family, and between each other in society, and of not losing our traditional Christian principles and ethics to avoid being indoctrinated by the brainwashed turbo-capitalist occidental society. I will show examples of how the covid laws and mandates permanently affected the growth of children and the manner in which they were taught to fear, hate, and segregate.

I will discuss the War in Ukraine and show how the youth was taught to expel and promote violence against their Russian classmates because of their ethnicity, to hate and ban music and literature originating from a certain geographical area, to normalize supporting wars, armaments and burning flags, and antagonizing and ostracizing those who dare rationally discuss the negative consequences for their own country in supporting a foreign war which isn't theirs.

I will show examples of how those who didn't support the burning and looting of entire cities were immediately tagged as a dangerous and evil racist. I will show how who doesn't support the amputation of children's reproductive organs and the children's mandatory indoctrination to sexual perversions in school is tagged as a transphobic bigot and can lose parenting rights. I will show how the world is becoming always more Orwellian and mad due to the efficiency of the modern propaganda machine. I will discuss the manners in which we can and must stop and prevent all this.

DR. JESSICA ROSE

Jessica Rose is a Canadian researcher with advanced degrees in Applied Mathematics, Immunology, Computational Biology, Molecular Biology and Biochemistry from Memorial University of Newfoundland, Bar Ilan University, Weizmann Institute, the Hebrew University of Jerusalem and the Technion Institute of Technology. For the past three years, Dr. Rose has been independently analyzing the Vaccine Adverse Event Reporting System (VAERS) database in the context of the COVID-19 products, to bring understanding to the public of the magnitude and range of the safety signals emitted from VAERS in the context of these products.

She has become a prolific writer ([jessicar.substack.com/peer reviewed articles](https://jessicar.substack.com/peer-reviewed-articles)), presenter (jessicasuniverse.com) and spokesperson for individuals suffering adverse events in the context of what are technologically and biologically novel products. She has presented her work to the European Parliament in Brussels, at three FDA Vaccines and Related Biological Products Advisory Committee meetings, and at many international conferences. She was also invited twice to provide testimony at United States Senate hearings, but on both occasions was not permitted to attend due to COVID-19 travel restrictions imposed on uninjected, non-U.S. citizens. Jessica has also written chapters in two upcoming books with regard to COVID-19 subject matter and participated in many video documentaries, and hundreds of podcasts and interviews – from Dr. Drew to Geopolitics and Empire - in order to bring scientific information to the public.

COVID-19-ASSOCIATED REPORTS OF ADVERSE EVENTS (AES) IN THE VACCINE ADVERSE EVENT REPORTING SYSTEM (VAERS) AND DNA (LPS?) IN THE MODIFIED MRNA COVID-19 PRODUCTS

Comprehensive harms associated with injection of the modified mRNA COVID-19 products are widespread and readily observable in VAERS. In addition to a 1,307% increase in reports between 2020 and 2021, there was a strong death safety signal in VAERS in January 2021 that supported withdrawal of the COVID-19 injectable products. As of September 22, 2023, 1,574,678 VAERS reports have been filed in the context of the COVID-19 products, and this does not take into account the under-reporting factor.

Recently, plasmid DNA (and potentially lipopolysaccharide (LPS) contaminants) have been discovered in a number of Pfizer and Moderna product vials. The DNA is a by-product of incomplete removal as part of the manufacturing process of the modmRNA for COVID-19 commercial product use. The commercial modmRNA was made using Process 2: a plasmid/*E. coli* system, inviting potential residual DNA from the plasmid to the final product, and LPS from the *E. coli*, if end-process purification of the modmRNA is insufficient. It was not disclosed to the public that the DNA used to produce the modmRNA for the clinical versus commercial products was made using PCR in the former (Process 1), and the plasmid/*E. coli* system in the latter (Process 2), meaning that no informed consent was possible. DNA including the Simian Virus 40 (SV40) promoter and enhancer, and multiple antibiotic resistance genes, have potentially been injected into billions of people. The expression vector disclosed by Pfizer did not contain the SV40 promoter nor the SV40 enhancer. The potential implications of the presence of the strong SV40 promoter, the nuclear location sequence SV40 enhancer, and the high levels of many DNA fragments are genomic instability and DNA damage and ultimately, cancer. These contaminants are potentially the cause of many other AEs reported to VAERS.

DR. DENIS RANCOURT

Denis Rancourt holds B.Sc. and M.Sc. degrees in physics, and a Ph.D. in physics from the University of Toronto. He was a Natural Sciences and Engineering Research Council (NSERC) of Canada international post-doctoral candidate in national scientific laboratories in France and in The Netherlands. He then became a national NSERC University Research Fellow (NSERC-URF), in Canada, and a lead researcher and professor at the University of Ottawa for 23 years, where he attained the highest academic rank of tenured Full Professor. He is an interdisciplinary research scientist, and has published over 100 articles in peer reviewed science journals, in many different areas of science. He is presently co-director and researcher at the non-profit “CORRELATION Research in the Public Interest” (correlation-canada.org).

ALL-CAUSE MORTALITY WORLDWIDE AND ROMANIA

Since 2020, we have made extensive studies of all-cause mortality, in relation to Covid response, for hundreds of countries, states, and provinces. All-cause mortality means counting all deaths per time (day, week, month) in a specific jurisdiction. The deaths are also counted by age and by sex. Covid response means economic disruptions, government response such as imposing limitations on movement and activities, medical treatment protocols in hospitals and in care facilities, medical non-treatment, and vaccination campaigns.

The measured all-cause mortality patterns are inconsistent with a spreading respiratory disease. All the excess all-cause mortality peaks and regional hotspots that we have studied are associated with aggressive measures and responses, not a spreading virulent pathogen. In the 50 states of the USA, excess all-cause mortality is proportional to and very strongly correlated to poverty by state ($r = +0.86$). Covid-period excess mortality does not cross state and national borders and is entirely associated with vulnerable population groups (elderly, disabled, poor, and newly unemployed young adult males).

The patterns of excess all-cause mortality become more regular following the global vaccine rollouts, starting in 2021. A causal relation between COVID-19 vaccination and excess mortality is established. Many jurisdictions around the world have no detected excess all-cause mortality until the vaccines are rolled out, after which their mortalities increase significantly. All countries studied enter a regime of high all-cause mortality, starting with vaccine administration in 2021, and maintained into 2022. Each COVID-19 vaccine booster rollout gives an additional excess mortality peak in the elderly age groups. The all-ages risk of death per injection globally is approximately 1 death per 800 injections (17 million deaths). The risk of death increases exponentially with age and reaches 1 death per 20 injections in 90+ year olds.

For this presentation, we include results for Romania. Romania did not have a peak of all-cause mortality immediately following the 11 March 2020 WHO declaration of a pandemic. It had large late-fall 2020 and 2021 surges in mortality, and spring 2021 and 2022 peaks associated with vaccine and booster rollouts, corresponding to approximately 21,000 vaccine deaths of mostly elderly citizens.

DR. CHRIS SHOEMAKER

Dr. Chris Alan Shoemaker, M.D. is a Comprehensive Physician from Toronto, Canada and member of the College of Family Physicians of Canada (CCFP). He has in his 45 year career worked in Emergency Medicine in both Ontario and British Columbia. He also did Family Practice on two military bases, providing direct care of Forces Members and their families.

More recently in 2020 through 2022 he worked at the West Ottawa Covid Care Clinic and was part of the Eastern Ontario Response Team to Covid-19. Based on studies showing VAXXHARM in the U.K. (Jan 2021 - May 2022), he has declared the need to 'Save the Children - End the Vaxx'. "There is one simple reason to not use any of the Covid-19 'Vaccines'. They cause DAMAGING IMMUNE EFFECT (Negative Efficacy vs. Covid) in every person who receives them."

THE TRUTH IS OUT: WHAT DO WE DO NOW?

In February 2022 I told the world that a 40% increase in (All Cause) deaths had occurred in the U.S.A. according to insurance actuaries (Davison et al.) in the last 9 months of 2021. This sudden explosion of deaths only occurred in the months following the introduction of the C19 VAXX. It did not occur in the full year (2020) of worldwide Covid-19 with No Vaxxes. In that year (2020) the overall death rate from all causes stayed neutral. The jump in Deaths from AFTER THE VAXXES and indeed DUE to the VAXXES was four times higher than a World War would cause. It was so huge and so rare that the Actuarial specialists said that it was a sigma-9 event and the likelihood of it happening to that scale was only once every 3 billion years - half the time of the existence of our Universe!!!

"As a result of these realities, I will present both the medical and political necessities that will save us from this human-made catastrophe."

DR. OANA MIHAELA SECARA

- Preventive Medicine&Hygiene and Dermatology specialist at “Saint Archbishop dr. Luca ” Onesti General Hospital, Bacau, Romania
- Hospital Manager (2013-2020), Hospital Health Director 2021-2022)
- Senior adviser – at the Bacau Public Health Dept. of the Ministry of Health(1998-2008)
- Assistant professor at the University of Medicine and Pharmacy “Gr.T .Popa” Iasi, Romania (1992-1998).

TRUTH PREVAILS OVER OFFICIAL DATA AND ROMANIA: SIGNIFICANCE AND OUTCOME

Officially reported Covid data in Romania (between February 2020 and September 2023) could not prevail over actual facts. Augmenting the population compliance regarding the experimental anti-Covid products (mRNA and others) failed, Romania standing for one of the lowest rates of Covid vaccination country worldwide. Although official Covid statistics relied on false databases, false medical definitions/logic and false medical principles, they involuntarily outlined the shortcomings of the narrative, of the health policies and of the anti-Covid so called vaccines. Real medical messages did not reach mainstream media, yet people soon became aware of the actual incidence of Covid 19 in Romania and of the real percentage of Covid severe cases/deaths. The challenge was comparing Covid official published data with the hospital real reports and with the real situation of hospitalized patients. By means of such information, the population of our country understood since the summer of 2020, the shortcomings of health policies in relation to Covid 19 outbreak. By February 2021, about 80% of the population developed a level of understanding upon the potential risks induced by the experimental anti-Covid products.

This presentation is an overview of official data in Romania versus our Covid hospital reports in the past three and a half years (the hospital registered the cases according to correct medical principles). Official assertions were confronted with real medical data about real cases from hospitals, that proved to be crucial in understanding and predicting the outcome of this outbreak. Over these years, for the sake of propaganda, more and more misleading conclusions were delivered by the official narrative, since the available official sites only operated with numbers and not with real cases. Details about medical reports gained steady importance in keeping the population informed during the Covid crisis.

Therefore, Romania stands for Truth, not propaganda.

DR. MARINA-IOANA ALEXANDRU/DR. ADRIAN ACIU

DR. ALEXANDRU

- Lawyer, mediator, trainer and coach
- Specialised in Constitutional law, protection of fundamental rights and freedoms guaranteed by the Romanian Constitution, administrative litigation, conflict management

DR. ACIU

- Psychologist, civic activist for more than 20 years in multiple causes
- Since 2017 – attended numerous parliamentary debates against vaccine mandates, public protests, contributed to countless written complaints against the abusive measures taken during the covid pandemic

WHY DID ROMANIANS RESIST THE VACCINATION AGENDA?

During the Covid pandemic, the Romanian authorities aligned themselves with the global deceiving narrative and exercised significant pressure on the population for vaccination against covid disease. Despite this, Romania reported only a 40% covid vaccination coverage, significantly less than countries in Western and Central Europe. We analyze the possible causes of this situation.

The mistrust in authorities, inherited from the communist times, is one big reason, but this is not the only one. We found that the most important factor leading to the resistance of the population is the long history of nonsensical political decisions taken after 1989 in Romania. These turned the population listless, unwilling to get involved in the politico-social game, and unsupporting of their national authorities. Together with this, several previous attempts at mandating vaccination, made people feel under constant threat and on guard against their own authorities. The civic activism had an important contribution in unveiling the hidden part of the political agenda and in encouraging people to defend their own rights and liberties.

DR. STEPHEN MALTHOUSE

Stephen Malthouse MD has practiced medicine in British Columbia, Canada since graduating from the University of Western Ontario in 1978. Throughout his career, he has pursued an interest in integrative medicine, exploring acupuncture, orthomolecular medicine and studying homeopathy at the IFH and CEDH. In 1994, while living in Nepal, he did research on the homeopathic treatment of childhood diarrhea. <https://pubmed.ncbi.nlm.nih.gov/10784270/>

Dr Malthouse has practiced medicine in urban, rural, emergency, palliative and family practice settings, employing an integrative approach to treatment. He is a founding member of the Canadian Integrative Medicine Association and the Canada Health Alliance, with the aim of shaping the medicine of the future. He is a sought-after speaker at conferences and public events and teaches courses on homeopathy.

Due to his public criticism of Covid era public health policies in Canada, Dr. Malthouse had his medical license suspended in 2022. He appears in the films *Love in the Time of Covid*, *Uninformed Consent* and *The Big Picture: Life Inside the Control Grid* <https://matadorfilms.ca/>, <https://www.bigpicturemovie.com/>

THE FUTURE OF MEDICINE: TOWARDS INTEGRATION

The limitations and, in some cases, the dangers of conventional medicine have become more apparent since Covid. Many other methods of healing have stood the test of time and have been in use for hundreds or even thousands of years, despite constant attacks by orthodox medical institutions, including regulatory colleges and journals. In the early 1900s, these systems were intentionally sidelined by “Rockefeller medicine” and petroleum-based pharmaceuticals were born and promoted by clever business practices. With the new drugs came unethical pharmaceutical companies.

In Canada today, if people can even find a doctor, they are afraid to make an appointment, not knowing if they will be treated by a biased or coerced physician. Hospitals are no longer trusted and very sick people hesitate to go there for emergency treatment.

Around the globe, governments are extending their reach to usurp and direct the doctor-patient relationship. Meanwhile, the medical system that dominates Western healthcare rarely cures anyone, thus propagating “revolving door” medicine, where even the best outcome can only result in the temporary stabilization of poor health. It takes little foresight to realize that most doctors will be replaced by artificial intelligence, programmed by Big Pharma. It is time to explore how the past and present of orthodox medicine can inform the creation of a better healthcare paradigm for the future.

DR. ANCA NIȚULESCU

HEAVY METALS CHELATION IN COVID 19 AND VACCINE INJURIES

After the national vaccination campaign against covid-19, many patients started to develop strange diseases, with insidious, persistent symptoms, difficult to include in the usual medical diagnostics. Some of the unvaccinated individuals, also, were left with persistent symptoms after the covid-19 disease.

Using the EDTA-DMPS challenge test, we established the heavy metals load in the urine and blood of patients with either long covid or post- covid vaccine injuries. We gave these patients an intravenous protocol for heavy metals chelation. We present the protocol and the results of this therapy.

Although heavy metals are not the only factor in the pathogenesis of the postvaccinal injuries or in the long covid syndrome, we noticed marked improvement after the treatment we used.

PHAR. ALINA MARILENA

- 2016- present - alternative medicine specializations: nutrition, gemmotherapy, Bach flower therapy

GEMMO-THERAPY IN COVID-INDUCED NEUROINFLAMMATION: RECENT RESEARCH

Neuroinflammation can be seen as a central nervous system-related immune response, triggered by injuries, PAMPs (pathogen-associated molecular patterns), or DAMPs (damage-associated molecular patterns), and conditions such as hypoxia that can progress from the initial to the chronic phase through various factors and mechanisms. Microglial activation and the subsequent production of chemokines and cytokines are involved in the recruitment of further innate and adaptive immune cells to the inflammatory site. SARS-CoV-2 mediates dysregulation of innate immune responses, leading to a cytokine release syndrome (CRS) with hyper-elevation of pro-inflammatory cytokines, including interleukin (IL)-1 β , IL-6, and tumor necrosis factor (TNF), as well as a delayed or muted type I interferon (IFN) responses, correlated with neuroinflammation and instability of blood-brain barrier (BBB) in acute, subacute and long COVID situations. Flavonoids from plant tissues such as luteolin, quercetin, apigenin, kaempferol, rutin, and naringenin have been reported to inhibit the microglia activation thus being a solution of alternative management of neuroinflammation in the situations above. Material and method:

We researched recent data from the scientific literature concerning gemmotherapeutic extracts from meristematic tissue's effects on neuroinflammation, oxidative stress and inhibition of microglia activation. Results: We identified meristematic tissues, containing luteolin, quercetin, apigenin, kaempferol, rutin and naringenin with antioxidant, anti-inflammatory and enhancing neurotrophic factors effects. Conclusions: Gemmotherapy that uses meristematic tissues in clinical practice, offer therapeutic tools for support in the management of neuroinflammation, even in COVID complex situation Key notes: gemmotherapy, neuroinflammation, COVID, microglia, flavonoids.

DR. SORIN STEGARESCU

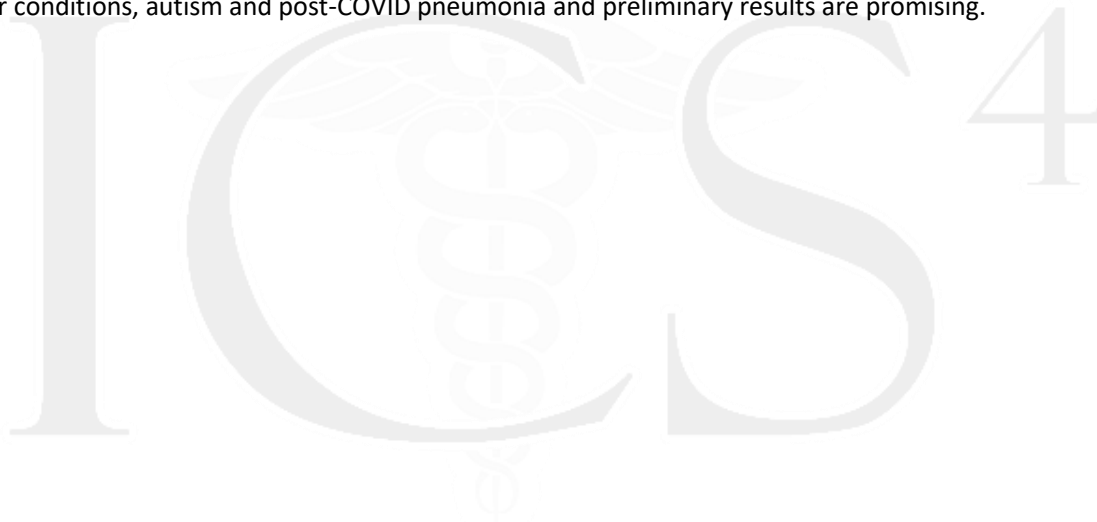

- Hyperbaric Oxygen Therapy Doctor since 2016
- University of Medicine “Carol Davila” București 1997
- Specialization in Orthopedics and Trauma Surgery 2010
- Certification in Acupuncture, Homeopathy, Emergency Medicine

HYPERBARIC OXYGEN THERAPY IN POST-COVID RESIDUAL PNEUMONIA

Hyperbaric oxygen therapy (HBOT) is mostly known for treating scuba and deep-sea divers affected by the rapid change in pressure around them.

The non-invasive nature, favorable safety profile, and common clinical application of HBOT make it a competitive candidate for several indications. Based on already completed clinical trials with proven success rates, FDA approved HBOT for certain conditions as of July 2021. Scientists across the world are investigating HBOT in many other diseases from cancer to cardiovascular conditions, autism and post-COVID pneumonia and preliminary results are promising.

DR. IONESCU IOANA RALUCA

- Carol Davila University of Medicine - Bucharest – 1986-1991
- Specialization: Laboratory Medicine – 1995
- Complementary studies: Acupuncture, Homeopathy, Api-phytotherapy
- Carol Davila University of Pharmacy - Bucharest – 1996-2001
- Lecturer in Acupuncture and Homeopathy in the courses organized by the Ministry of Health
- Lecturer in Acupuncture in the course organized by the Romanian Society for Traditional Chinese Medicine – Targoviste
- Organizer of the homeopathy course "Dynamic Evolution System in Homeopathy" - annually conducted by the italian Dr. Roberto Petrucci in Bucharest since 2016.

HOMEOPATHY AND ACUPUNCTURE IN COVID 19 PREVENTION AND TREATMENT

This paper presents my experience as a clinician using homeopathy and acupuncture in the treatment and prevention of SARS-Cov2 infection. During and after the pandemic of SARS-Cov-2, I used acupuncture and homeopathy for:

- Strengthening the constitution and regulating the immune system of the patient, so he can optimally respond to the infection of Sars-Cov-2
- Treating mild and moderate cases of Sars-Cov-2 and adding it, as a complementary treatment to the allopathic treatment for severe cases
- Balancing the emotional status affected by the disease or by the restriction measures imposed in the society
- Treating post-Covid syndrome, lingering symptoms, strengthening lungs affected by the disease, and addressing the physical and mental exhaustion that might persist for a long time
- I emphasize that in treating long-Covid syndrome, the approach of homeopathy and acupuncture is similar to the approach for all chronic pathologies, which is why the therapy is comprehensive and may require long periods of treatment, carried out in multiple stages

MR. AURELIAN POPA

Ladies and gentlemen, here comes the most viral civic activist in Romania, also called the NON-submissive outlaw from the countryside.

He annulled 20 pandemic sanctions in court, suspended the green certificate in January 2021, showed how legal behavior can be imposed against the abusive state authorities and, recently, obtained the first complete and definitive annulment of the state of alert in Romania.

He has a score of 20-0 with the Gendarmerie and 3-0 with Arafat + the Government of Romania.

He informed us, ahead of time, about the coming dictatorship under medical pretext, he demonstrated, with studies and concrete data, the dangers of administering some experimental serums, despite the mega-censorship imposed by the online environment.

He opposed with all his being and intelligence, the INJUSTICE but also the illogical CONTROL exercised over the Romanians. He remained uninterruptedly on the side of Truth and Justice, without compromises or oscillations, constantly promoting the Sovereign-Patriotic values of the Romanians.

Ladies and gentlemen, we present you a tireless fighter, an UNRULED outlaw, Aurelian POPA

THE CIVIL AND JUDICIAL FIGHT IN ROMANIA

It is no secret that Romania was a leader in the fight against vaccination rates and pandemic mandates. Romania was an example of how to successfully win against the struggle for medical consent, freedom of choice and bodily sovereignty. In this presentation, we will discuss the reasons for Romania's success.

The Romanian people's fight for freedom and rights had four pillars:

- Street protests
- Alternative Media Activity
- Justice
- Petition

This presentation will cover how, these four ingredients, used in conjunction, managed to lower the Covid-19 vaccination rate in Romania and kept the people of Romania safe and free.

Additionally, we will uncover the key reason why countries that held mass protests were unsuccessful in stopping mass vaccinations compared to Romania, which had much smaller ones.

DR. ALEJANDRO DIAZ

Dr. Alejandro Diaz is a Pediatric, Allergist-Immunologist, Immigration Doctor & Global Health Specialist. He has been a speaker in over 25 countries and venues like, the White House, the Mexican Senate and the European Parliament, and has screened hundreds of thousands of immigrants.

Dr. Diaz worked as a panel physician for the governments of the United States and Australia as well as other countries. Dr. Diaz participated in politics in Mexico.

BIOPOLITIKS

Is a concept that describes the way that governments and political systems should interact with the life of individuals and populations regarding public health, reproduction, biology, and general well-being. From a medical standpoint, it is a concept that examines the intersection of politics, governance, and healthcare.

It explores how political power and institutions influence the management and control of populations, particularly in the context of public health and medicine. Biopolitiks involves the exercise of political power to positively impact the biological aspects of human life. In the medical context, this means that governments and governing bodies are concerned with not only the health and welfare of individual citizens but also the health of the population as a whole.

Biopolitiks is closely tied to public health policies and practices. Governments play a role in establishing and enforcing public health measures. Biopolitiks covers areas such as populational health, biopower, medical ethics, health disparities, both authorized and unauthorized immigration among many others. To understand why Biopolitiks is spelled with a K we must dive into its origins. The letter K is derived from the Greek “kappa” which was influenced by the Semitic “kaph” which is the symbol for “open hand”. Which is precisely what this concept represents; an open hand or invitation, if you will, to scientists and politicians alike to participate in the transformation of the relationship between human health and politics. We have to create a change in the implementation of this philosophy.

We the people, as committed fellow physicians and scientists who have risked our jobs and even our lives to speak the truth through the dark years of the pandemic and who have a keen and genuine interest in changing the future of health care for the benefit of the world population, have to participate as experts in our fields and get involved in Biopolitiks with politicians and help them make the best decision for future generations.

DR. PAUL ALEXANDRU

Professional Competencies (self-employed: PFA):

- Research in the field of human diseases (e.g., COVID-19) not commonly found in the animal kingdom, particularly neuropsychophysiological pathology; University teaching activities – obtaining the university professor's degree through the effect of Order No. 6560/2012 of the Ministry of Education and Research; Temporary university teaching activities in the private sector based on annual collaboration contracts (as a self-employed professional) from 2014 to 2020, in the private university education system, in the local area, teaching Physiology and/or Psychiatry;
- I have not been admitted to the university since May 2021 due to my position as an anti-vaxxer regarding mRNA-viral and/or recombinant DNA products, anti-mask, and anti-vaccine certificate (green pass).

Current Activities – 2021 - present (self-employed; PFA):

Extrajudicial expertise on suspected outbreaks of African Swine Fever (ASF) in pig complexes – as a veterinary epizootologist; Extrajudicial expertise on medical malpractice cases related to COVID-19 pandemic deaths and post-COVID vaccination deaths/illnesses – as a Doctor of Medical Anthropology; Collaboration on Medical Anthropology research with the Institute of Anthropology; Substitute professor for colleagues going for further training and scholarships abroad at various veterinary and/or human medicine faculties across the country; Interdisciplinary conferences and courses upon request from colleagues at various universities and faculties, not limited to medicine(!), across the country.

Upcoming Books:

- COVID-19 Vaccination and Vaccinations – Volume II - Romanian Government, ECDC, and WHO Plans (estimated release: Nov/Dec 2023).

DECIPHERING THE PARAPHRASEOLOGICAL ASPECTS OF THE 2023-2030 NATIONAL VACCINATION PLAN

In August 2023, the Ministry of Health within the Government of Romania invited the public to comment on a Government Decision Project concerning the National Vaccination Plan for the period 2023 – 2030. In this regard, the Ministry's website featured the Background Note with an Annex of the Project open to amendment by interested parties who wish to participate in the online video conference organized by the Ministry of Health on August 17, 2023, at 15:00. Following the study of the Background Note with the Annex of the Project, we proceeded with a paraphrase decryption of the text to uncover the Ministry's actual objectives with this project, beyond the reasons presented in the background note and its annex.

Keywords: *paraphrase decryption, attention diversion, lexical evasion, and lexical ambush.*

Materials and Methods: The project itself, its study, determining whether there are sentences in the context that demonstrate attention diversion, lexical evasion, and lexical ambush (methods also used in forensics and psychology).

Conclusions: The Ministry's aim with this project is to transfer the sovereignty of public health in Romania to the WHO and ECDC;

- as evidenced by the first sentence in the Annex of the Background Note – see **section 1.1.1, which mentions: "Promoting Vaccination Law and other regulatory tools favorable to vaccination."**

- and the last sentence in the same Annex – section 9.2.1, which states: **"Supporting the CNV (National Vaccinology Committee) in joining the International Vaccinology Committees network within the WHO and ECDC (European Center for Disease Control) and participating in (...).**

Note: further details/proof of attention diversion, lexical evasion, and lexical ambush will be presented in the extended version and during the summit.

DR. JILL MALONE

Dr. Jill Malone is a scientist, regulatory specialist and author. She specializes in preclinical, regulatory, and clinical project management, with special expertise in public policy and Federal regulatory issues. Dr. Jill Malone has been a co-founder of a number of biotech companies, two of which have gone to IPO and has held positions in the biotechnology industry and academia. She has a strong publication record in gene therapy, immunology and public policy for infectious disease outbreaks. During the pandemic, she has been an early advocate for early treatment and has spoken out against mandates and the mRNA "vaccines". She serves as vice-president of the Malone Institute, whose mission is to bring back integrity to government, the biological sciences and medicine. Dr. Jill Malone regularly writes for Dr. Malone's substack, "Who is Robert Malone", which has 315,000 subscribers.

THE PANDEMIC USED AS A CATALYST FOR NEW WORLD CONTROL

By globally synchronizing the public health response across the United Nations (UN) member states, new powers were granted to the UN. These universally applied regulations and multilateral agreements have created a vast interlocking public health network throughout the world, which in turn birthed a new, globalized administrative State.

The UN has been quietly gestating and building power for years prior to the pandemic through agreements such as "Agenda 2030", and has now become a sovereign power unto itself. This is the shadow global government that seeks to regulate every dimension of our lives.

Early in the pandemic, the UN (through its subsidiary The World Health Organization (WHO)), jointly declared that a global vaccine passport was needed. In response, the leaders of the G-20 issued a declaration in 2022 supporting development of a global standard of vaccination for international travel and the establishment of "global digital health networks" that build on existing digital COVID-19 vaccine passports. In June 2023, a new initiative between the EU and the WHO for strategic cooperation on global health issues was announced. This agreement seeks to "bolster a robust multilateral system with WHO at its core, powered by a strong EU".

The WHO will amend the International Health Regulations (IHRs) and develop a new agreement to govern the "pandemic prevention, preparedness and response" of future outbreaks, which includes public health emergencies of any type. These changes are predicated on the G-20 global adoption of the "vaccine passports" mentioned above. These passports will collect and contain private health data, enable surveillance, tracking and control of individuals and populations worldwide. The G-20 is working with the International Monetary Fund (the financial agency of the UN), the World Bank (which has a founding treaty relationship with the UN) and the Bank for International Settlements to formalize the use of central bank digital currencies (CBDC) in banking systems. The BIS specifically refers to "the disruption caused by Covid-19" as a driver to create CBDCs. The pandemic has allowed world leaders to coalesce global administrative power under the guise of public health, which has been weaponized to gain control of passports, travel, banking and the international economy. It is just a matter of time before these vaccine passports will be coupled with CBDCs. Then these passports can be used to deny the unvaccinated or other dissenters access to, or use of, both travel and their own money. Once international passports, CBDCs and elements of a command economy via the UN's Agenda 2030 are put into place, the groundwork for a new world order will be complete. This new administrative state, whose core power derives from the UN, is a spiderweb of rules, regulations, agreements and treaties. It will be virtually unbreakable. From there, it is only a matter of time until national sovereignty becomes an obsolete concept.

DR. PIERS ROBINSON

Dr Piers Robinson is co-director of the Organisation for Propaganda Studies and board member of PANDA and the International Center for 9/11 Justice. He has held the following academic posts: Professor/Chair in Politics, Society and Political Journalism, School of Social Sciences, University of Sheffield (2016-2019); Senior Lecturer in International Politics, University of Manchester (2005-2016); Lecturer in Political Communication, University of Liverpool (1999-2005).

He is the author of *The CNN Effect: The Myth of News Foreign Policy and intervention* (Routledge 2002), co-author of *Pockets of Resistance: British News Media, War and Theory in the 2003 Invasion of Iraq* (Manchester University Press 2010) and co-editor of the *Routledge Handbook of Media, Conflict and Security* (2017). He has published articles in journals including the *Review of International Studies*, *Journal of Communication*, *Critical Sociology*, *Journal of Peace Research*, *European Journal of Communication*, *Political Science Quarterly*, *International Journal of Contemporary Iraqi Studies*, *Media, Culture and Society*, *Political Studies and Media*, *War and Conflict*.

PROPAGANDA, INFORMATION AND MEDIA, CANCEL CULTURE and the COVID-19 Event

Although poorly understood across Western liberal democracies, propaganda remains a central tool through which power is exercised. As a form of non-consensual persuasion, propaganda campaigns frequently involve deceptive communications – involving outright lying lies but more often omission, exaggeration and mis-direction – as well as persuasion tactics involving incentivization and coercion. Evidence for the deployment of propaganda during the COVID-19 event can readily be identified and includes the use of behavioral scientists as part of engineering public compliance through, for example, increasing ‘perceived level of personal threat’. As important as message promotion has been the aggressive suppression of opinions and analysis running counter to official narratives including de-platforming of dissident scientists and other voices by social media companies, co-operation between government agencies and ‘big tech’ in order to censor opposing voices, surveillance of oppositional voices and character assassination (smear) campaigns against individuals.

The ‘cancel culture’ experienced during the COVID-19 event now appears to be becoming entrenched via a ‘censorship industrial complex’ that combines with the emergence of online harm legislation and other ‘counter-disinformation’ initiatives. These developments are contrary to elementary principles relating to both freedom of expression and rational scientific debate and, predictably, provide significant opportunities for political and economic groupings to pursue agendas in the absence of appropriate democratic debate and scrutiny. Indeed, there exist prima facie grounds that precisely this has occurred during the COVID-19 event, witness the emergence of bio-security regimes and other examples involving centralization of political and economic power via initiatives such as central bank digital currencies, digital ID, the pandemic preparedness agenda, and censorship regimes. These developments present a profound threat to democracy and the well-being of populations.

DR. HARVEY RISCH

Dr. Harvey Risch is Professor Emeritus of Epidemiology at Yale School of Public Health, elected Fellow of the American College of Epidemiology, and elected member of the Connecticut Academy of Science and Engineering. He is a practicing epidemiologist with more than 40 years of research and teaching experience. Dr. Risch received a Bachelor of Science degree in mathematics and biology from the California Institute of Technology in 1972 and completed medical training at UC San Diego School of Medicine in 1976. He then completed a PhD in biomathematics in 1980 at the University of Chicago, where his dissertation work involved studies of the general stochastic epidemic model, on which he has published in the peer-reviewed scientific literature.

Dr. Risch has published approximately 400 peer-reviewed original research papers in very well-regarded scientific journals and has an h-index of 109, with more than 51,000 publication citations to-date. Dr. Risch has been Associate Editor of the Journal of the National Cancer Institute since 2000, Member of the Board of Editors of the American Journal of Epidemiology from 2014-2020, and Editor of the International Journal of Cancer since 2008.

In May 2020, Dr. Risch published the seminal paper on early treatment of high-risk Covid outpatients in the American Journal of Epidemiology (<https://doi.org/10.1093/aje/kwaa093>), which has been downloaded more than 91,000 times and viewed by more than 166,000. Dr. Risch was the senior author of the outpatient treatment clinical trial study in Brazil (<https://doi.org/10.1016/j.tmaid.2020.101906>), and has co-authored with Dr. Peter McCullough two papers that form the now-standard understanding of early outpatient Covid-19 management (<https://doi.org/10.1016/j.amjmed.2020.07.003> and <https://rcm.imrpess.com/EN/10.31083/j.rcm.2020.04.264>).

THE DISTORTION OF EVIDENCE-BASED MEDICINE

COVID-19 exploded what is meant by the term “science” in professional, media and public usage. Those who spoke officially of “science” publicly misrepresented plausible explanations as if they were scientific. Scientific knowledge proposes theories to explain nature. These theories create testable hypotheses that are examined by empirical or observational work. Such work tends either to support or refute the theories, which leads to tentative acceptance or possible rejection of the theories, and more work to confirm or refine them. It is the verification work that is scientific, not the theories. In daily life, people make inferences by plausibility that comports with previous knowledge. However, science does not work this way. Plausibility provides instant acceptance, whereas science requires the careful collecting and evaluating of evidence.

One problematic example of the use of plausibility rather than science is found in the discipline of “Evidence-based Medicine” (EBM). EBM was defined in 1991 to combine “the best medical evidence” with individual clinical experience. By cherry-picking supposed “best evidence” rather than entertaining *all* valid relevant evidence, as is done more generally in science, EBM plausibly propped up randomized, controlled trials (RCTs) as the only form of trustworthy evidence, creating a protection scheme where the high price of conducting RCTs made them unaffordable for evaluating generic medications and other low-profit agents. The inherent idea that randomization in RCTs automatically cures confounding biases, to which non-randomized studies are claimed to suffer, is plausible but wrong, because randomization doesn't work well enough until there are hundreds of people in each of the outcome groups of the trial, and this is rarely the case because RCTs are never designed for this to occur; they are designed only to detect significant associations, which typically leads to studies that are too small. This misrepresentation has flourished because most medical and clinical scientists do not understand the epidemiologic issue of confounding. During the COVID-19 pandemic, because of this and other misrepresentations, critics have been correct in asserting that public-health policies and medication approvals and rejections have been subject to substantial industry corruption rather than objective scientific evidence.

PROFESSOR VINCENT PAVAN

Invited by the association L'union fait la force 88, the researcher and mathematician Vincent Pavan gave a conference in Épinal: "Covid-19: mathematical and epidemiological corruptions". A thorough dissection of the scientific frauds of the crisis. "You can debate everything but the numbers," the government ad for the summer of 2021 peremptorily asserted. But Vincent Pavan does not share this opinion. This mathematics researcher is well-placed to know that numbers can be made to say whatever you want, especially if you fiddle with them a little, even a lot. He clearly demonstrated this during his conference in Épinal: "Covid-19: mathematical and epidemiological corruptions". A powerful synthesis of what he denounces as two years of scientific fraud.

READ ARTICLE: <https://frenchdailynews.com/politics/5871-covid-19-vincent-pavan-scientific-fraud-of-health-policy>.

FALSIFIED MATHEMATICS AT THE HEART OF PROPAGANDA DURING COVID-19

In her documentary "Never Again Is Now Global", a Jewish doctor, camp survivor, and distinguished activist Vera Sharav declared: "Those who are responsible for the pandemic have used two of the weapons the nazis used which were figures and propaganda. Propaganda feeds the fear."

As a matter of fact, in many Western countries, figures obtained from mathematics, computational, and numerical simulations were used to support public health decisions, for example, lockdowns, bar and restaurant closures, or sanitary pass, to name but a few.

Though the methods of mathematical epidemiology were analyzed and denounced in 2010 in France by senators who carefully investigated the H1N1 flu administration fiasco, it appears that the same category of pseudo-scientific epidemiologists has been responsible for misusing and corrupting deterministic and statistics methods, in order to promote liberticide measures supposed to control the COVID-19 epidemic.

In this presentation, we highlight different fraudulent computations by the French Private Foundation "Institut Pasteur" which produced falsified computations in order to manipulate the French population.

DR. LOUIS FOUCHE

Dr. Louis Fouché studied philosophy and ancient history, then studied medicine and became a medical doctor specialized in Critical care medicine and anesthesiology at the Paoli-Calmettes Cancer Institute, and then at the public university hospital of Marseille. He obtained an advanced master's degree in health ethics and anthropology of the Health. In 2020, he was driven to take care of severe COVID-19 patients, and, supported by Didier Raoult, he criticized the health policy carried out in France concerning confinement and the wearing of masks. He contributed in setting up a network of caregivers for Covid-19.

In October 2020, he founded the Reinfocovid collective, which brought together thousands of doctors, universities, researchers, caregivers, and citizens across France and worldwide to resist the overwhelming narrative of fear surrounding the Covid-19 pandemic.

In his book, All resistant in the soul - Let's light up the World of Tomorrow! published in 2021, he analyzed the measures taken against the Covid-19 pandemic and their effects and the systemic crisis our occidental societies are doomed to cross, unraveling the hopes and the tracks toward something better. He also published in 2021 Agony and Renewal of the Healthcare System, where he showed the flaws and hopes surrounding the digital transhumanist and algorithmic healthcare transformation. His most recent book Cross the Fear, an Odysseum through the Real, published in 2023, addressed the question of fear and courage, in the never-ending terrorist narrative of the authorities, to enlighten our responsibility in the building of our individual and collective destiny.

MD BECOMING AI

The use of Artificial Intelligence (AI) for medical advice can be potentially dangerous. While AI can provide certain recommendations based on data analysis, it lacks the empathy and emotional intelligence required for effective patient care. As a result, relying solely on AI-generated medical advice may lead to misdiagnosis, improper treatment, and even harm to patients. It's important to consider the limitations and potential risks of AI in healthcare and ensure that any AI systems are used with human oversight and input to provide the best possible care for patients.

The use of AI in medical decision-making raises several ethical concerns. One such concern is the potential for AI algorithms to perpetuate and even amplify biases that exist in the data they are trained on, leading to discriminatory practices. Another issue is the potential for AI systems to make decisions without proper human oversight or input, leading to suboptimal care or even harm to patients. Additionally, there are concerns about the transparency and accountability of AI decision-making, as well as the potential for AI to replace human judgment altogether.

The information given by Artificial Intelligence algorithms can be controlled. To prove this, everything in this summary until this sentence was generated by an AI program. It took just one sentence from me, stating the direction I wanted to take on this summary, to give me reports supporting my views.

This control of information over medical treatment is not only unethical, but it also poses a real threat to our health and well-being because AI MDs can be programmed to enforce any narrative and procedure they deem 'necessary'. The dangers of this are immeasurable and will be thoroughly discussed in my presentation.

DR. GIUSEPPE TRITTO

Global Biomedical Expert. He is the Executive President at WABT - World Academy of BioMedical Sciences and Technologies in Paris, France. He is an internationally known and respected expert in biotechnology and nanotechnology.

Dr. Giuseppe Tritto is also a Professor of Microsurgery and Microtechnology and Nano Technologies as well as Deputy Chief Physician at Kemineni Institute of Medical Sciences in India. Also the President of ICET/International Council for Engineering and Technologies.

POPULATION CONTROL AND EUGENICS: THE THREATS FOR HUMANITY AND HUMANKIND

The Dual Use of Research Concern- DURC - is on the spot of scientists for COVID'19 origin and his Singularity and for advanced breakthrough Populations Health Protection Strategies for emerging infectious diseases - EIDs.

On a more general vision of the future Destiny of the Humankind and of the Biodiversity of the Planet, the inclusive embedding of Dark Biology to support decision-making processes on populations regulation, including reproduction, aging and reparative and regenerative medicine, using synthetic biology and platforms of gene-encoded vaccines and biotherapeutics, defines an innovative, but doomed vision for a new Biological Reset of the Earth Biome and the Overcoming of the Anthropocene Era.

COVID-19 has raised a great debate on DURC concerning Infectious Disease Outbreaks from «wild» and/or from PL3 and PL4 Security and Safety Labs for biomedical research.

It is a Political Responsibility to ensure Human Safety, Homeland Security and BioSecurity: Foster a culture in which politicians listen to scientists; on the other side foster a Culture in which scientists assure their Scientific Integrity: this is the great lesson from Luc Montagnier's action and his responsible and ethical role in human society. The Dual Aspect of Risk Management –DARM - in Health and Health-Care is the second aspect of the main message of Luc Montagnier in the pandemic 2019. Emerging patient-centered, expendable and expandable, care in epidemics (les nouvelles strategies de soins, centres sur le patient, dans les epidemies des maladies infectieuses emergentes) : Modernising Epidemic Science: enabling Patient-centred Research during Epidemics:

The Public Health Value and Impact of Patient-centred Assessments: the Public Health-Care System is ready?

WABT Academy, inspired by the action and the sacrifice of Luc Montagnier, has decided to submit THE ACT on the synthetic laboratory origin of SARS-CoV-2 and SARS-likes to the International Criminal Court of Le Hague, based on the article 7 of the Statute of Rome, for Crimes against Humanity: The ACT describes for the first time the concept, the design and the implementation of a BIOCRIME on mass populations. The three major items of UN principles, the 1975 International Bioweapons Convention, the Resolution of the General Assembly of UN on the Protection of Human Genoma in 1997, the Resolution 59 of the Freedom Information Declaration of UN have been violated and represent the main references into THE ACT.

The clear infringement of these three main pillars of UN and the absolute violation of the UN Charter of the Universal Protection of Human Rights indicate the need of a global action of people and populations to protect Humankind and the unique Earth Biome. The Sciences of Death propose the Euthanasia of Populations and the Euthanasia of People, through the control of the Cycles of Life and Fertility Power. The Sacrifice of many scientists and medical doctors in the protection of Life must strengthen the efforts of civil society organizations and of International institutions to confirm and consolidate universal Human Rights Protection.

DR. STEPHEN HATFILL

Dr. Steven Hatfill is a physician, virologist and Public Health consultant. His fellowships include Oxford University, the NIH, and the National Research Council where he studied the Ebola Virus at the US Army Medical Research Institute for Infectious Diseases at Fort Detrick. He is board-eligible in Hematological Pathology. A former defense contractor with Science Applications International Corporation, in 2000 he underwent training/certification as a UN Weapons Inspector for UNMOVIC. For over a decade he served as an Adjunct Assistant Professor in the Department of Microbiology, Immunology, and Tropical Medicine at the George Washington Medical Center and School.

In 2015, he trained the first Rapid Hemorrhagic Fever Response Team for the National Medical Disaster Unit in Kenya, Africa. He is a Senior Fellow at the London Center for Policy Analysis and lead author of “Three Seconds Until Midnight” prophetically published two months before the US COVID-19 outbreak. Throughout 2020, he served as a senior medical and scientific advisor to the Executive Office of the President of the United States. There he fought for the doctrine of early outpatient drug treatment for COVID-19.

GAIN OF FUNCTION AND BIOLOGICAL WARFARE

The net result of 60-years of Biological Warfare (BW) research is 14 microorganisms that can be stabilized into munitions that if properly deployed, are capable of causing “city-killing” nuclear-equivalent fatalities. The US ended its BW program in 1969, but Russia and China continue to try to expand their traditional Tier-1 pathogen list by performing Gain of Function (GOF) experiments. The concept of GOF dates back to the 1950’s when scientists first performed viral “serial passage” studies on animals. During the 1980’s, GOF studies in the Soviet Union inserted full-spectrum antibiotic resistance and neuropathy-causing Myelin Basic Protein genes into microorganisms. In 1998, scientists created a lethal hybrid Vaccinia virus. In 2001, researchers created a hybrid mousepox virus that was lethal to both vaccinated and unvaccinated mice. The policy debates over GOF are now amplified by questions concerning the origin of COVID-19.

In reality, the debate over GOF experiments is mute. While a global ban on GOF studies may be desirable to reduce the accidental civilian release of enhanced-pathogens, this will have little effect on existing State-sponsored BW programs trying to increase their Tier-One Pathogen list.

The key to a combined biological defense against both BW and lethal natural pandemics is to train local communities how to perform a surge infectious disease mass-casualty response and facilitate early community drug treatment. The finding that common drugs such as Hydroxychloroquine, Ivermectin, and the common diuretic Spironolactone have safe, strong, antiviral activity, indicates a priority program is needed to examine the over 20,000 existing pharmaceutical compounds for possible off-label antiviral activity against the 26 viral families that contain human pathogens.

DR. DAVID BELL

David Bell is a clinical and public health physician with a PhD in population health and background in internal medicine, modelling and epidemiology of infectious disease. He has worked in global health and biotech for the past 20 years. Previously, he was Director of the Global Health Technologies at Intellectual Ventures Global Good Fund in the USA, Programme Head for Malaria and Acute Febrile Disease at FIND in Geneva, and worked in infectious diseases and coordinated malaria diagnostics strategy at the World Health Organization. He currently consults in biotech and international public health and is a senior scholar of the Brownstone Institute.

THE WHO OR PANDEMICS: WHICH IS THE GREATER RISK?

The world is concentrated on a perceived increasing threat of pandemics. Resources being allocated to this are unprecedented in international public health, while proposed solutions involve restrictions on human rights unseen before 2020 in most democratic nations. This agenda is the culmination of years of rising private sponsorship of, and influence on, international health policy. While the World Health Organization's (WHO) initiatives to amend the International Health Regulations and introduce a new pandemic 'accord' or treaty are the leading expression of this change, they are part of a far larger agenda to increase supra-national and corporate control over health policy globally.

The Covid-19 pandemic highlighted both the methods and the expected outcomes of this pandemic preparedness and response (PPR) agenda. Contrary to its own recommendations on pandemic management, WHO promoted a highly destructive and centralized approach to containment that had little impact on viral spread but proved extremely costly in terms of human and economic health. While poverty grew globally, corporations and individuals sponsoring WHO policy reaped large profits through sales of commodities including diagnostic tests, drugs and often mandated vaccines.

This concentration of wealth will continue through the PPR agenda. A growing public health workforce will comply, as public health professionals have with previous totalitarian regimes, based on clear self-interest. There is an increasing urgency for both the public, and the legislators that represent them, to take back control of the health agenda. This must insist on a return to basic norms of medical ethics and human rights, rebuilding structures to support these that are resistant to the influence of commercial and narrow political interests. Human rights and the sovereignty of individuals and countries are too important to compromise on the altar of corporate profit.

DR. MERYL NASS

Meryl Nass is a physician and researcher who proved the world's largest anthrax epidemic was due to biological warfare. She revealed the dangers of the anthrax vaccine, investigated Gulf War Syndrome, and challenged the FBI's investigation of the anthrax letters. She has given 6 Congressional testimonies and many testimonies to state legislatures on bioterrorism, vaccine safety, COVID, and public health. She has consulted for the World Bank, the Cuban Ministry of Health, and the Director of National Intelligence.

Her medical license was suspended in 2022 for prescribing COVID medications and for allegedly spreading misinformation.

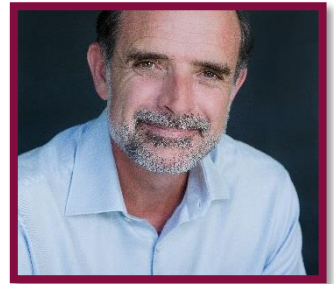

THE WHO COUP

The WHO is being used for a global coup under the guise of managing medical emergencies. The proposed amendments to the WHO's International Health Regulations and a new Pandemic Treaty will be discussed, as well as the new concept "One Health" and the roles of other international organizations in this operation

ICS⁺ 4

MR. NICK HUDSON

Nick Hudson is an actuary with broad international experience in finance, who has settled into a career as a private equity investor. He is a man of wide-ranging interests—an avid reader of canonical literature, a classical music aficionado, and an enthusiastic amateur ornithologist. He has been invited to speak on various topics including epistemology, corporate governance, investment management, and more recently, the pandemic.

THE DANGERS OF CENTRALIZED POWER

Heuristic: The general rule of thumb. If any problem is presented as a global crisis admitting only global solutions, amid silencing of dissent, then it is a scam. We see even non-problems or small local problems presented as global crises. Instead of presenting science as an evolving project, it is presented as a static consensus.

These patterns are proof of a scam. Whenever something is presented as "the science" or "a consensus", you can know with absolute certainty that we are dealing with a scam.

Overview: Centralization is problematic for many reasons, which have been progressively excluded from the education system. Not so long ago, a normal graduate would have been able to explain quite easily why centralization is such a problem.

I will cover the various aspects of this problem under the following headings:

- Complexity theory
- Epistemology (the theory of knowledge)
- Economic science
- Political science
- Philosophy of ethics

PAUL BURGESS

Paul was the water resources engineer in charge of all aspects of water resources from planning reservoir systems, flood control, drought management, flood warning systems etc for the country of Wales. U.K.

He built his first climate mathematical model back in 1971. Now retired, he devotes his spare time into fighting the entire Net Zero agenda that has swept the world. He has published over 80 videos on his YouTube channel in his fight against the climate alarmism agenda.

Paul is a keen environmentalist and has sailed the world in his catamaran uncovering, firsthand, the climate alarmist's fabrications. He is very concerned about the environmental damage being done to the planet in the name of Net Zero.

In addition to fighting climate alarmism, Paul produces many videos pointing out the absurdity of the move by Western governments towards so-called 'sustainable energy' and the damage it is doing to the environment whilst maintaining many delusional claims.

His videos can be viewed on: [youtube.com/@climate_realism](https://www.youtube.com/@climate_realism) by Paul Burgess

CLIMATE ALARMISM AND POPULATION CONTROL

- Climate Alarmism is based on models, which are opinions and not evidence.
- The Natural Climate Cycles
- The myth that CO2 has any major influence on the future climate.
- The sensitivity of the climate to CO2
- The benefits of more CO2
- The deception techniques of climate alarmists
- The denial of the UK government to simple energy deception facts.
- The techniques of population control based upon a CO2 myth.

DR. HAGIMA GEANINA-ELENA

- European University Diploma on Gynecological and Mammary Oncology - France - 2019
- 2019 – Examination in Gynaecological Oncology – ESGO theoretical knowledge test
- Gynecological oncology - Romania
- European University Diploma in operative gynecologic endoscopy (Clermont- Ferrand)
- Laparoscopy, Colposcopy, Hysteroscopy
- Treatment of couple infertility and assisted human reproduction
- Maternal fetal medicine
- Certificate of Competence –the 11-13 weeks scan - The Fetal Medicine Foundation –
- Ultrasound in Obstetrics and gynecology.

THE DANGERS IN THE AIR AND THE CONNECTION TO THE PANDEMIC

As we all have observed over the past three years, pandemic waves are accurately predicted. It is clear that there is premeditation in these types of actions - "problem-reaction-solution".

Although there is much to research and confirm, I will expose some information, obtained with great difficulty. For about two years now, I have noticed, together with people all over the world, that the dust we breathe in is magnetizable. Furthermore, I have found that the sediment in rainwater is 100% magnetizable, which cannot be a natural phenomenon.

I have asked several authorities, whether they can carry out the identification of metals and graphene in dust. They either did not answer or replied that they were not able to make such determinations, showing no interest in this important subject.

After several attempts, I found a lab that did semi-quantitative analysis of filtered rainwater (without sediment) for metals and, subsequently, performed an electron microscopic examination of the sediment. Semi-quantitative analysis identified several elements, including barium, strontium, aluminum, iron, copper, zinc, calcium, nickel, and small but identifiable amounts of lithium, and arsenic.

Because the amounts of iron were relatively small, I assumed that there were other magnetizable particles in the sediment. Scanning transmission electron microscopy and energy-dispersive X-ray spectroscopy (EDS) showed that the sediment was not only made up of particles but also of numerous micrometric fibers containing carbon, silicon, but also small amounts of aluminum and iron.

I deduced that there would be particles and fibers of silicon carbide functionalized with metals, which gives them magnetizable properties. These types of particles and fibers belong to an advanced technology, as silicon carbide and silicon are also used for semiconductors, sensors that can self-assemble into "smart dust".

PROFESSOR MATTIAS DESMET

Mattias Desmet is recognized as the world's leading expert on the theory of mass formation as it applies to the COVID-19 pandemic. He is a professor of clinical psychology in the Department of Psychology and Educational Sciences at Ghent University (Belgium) and a practicing psychoanalytic psychotherapist. His work has been discussed widely in the media, including on The Joe Rogan Experience and in Forbes, The New York Post, Salon.com, and Fox News, among hundreds of other outlets. His interviews have been viewed by millions of people around the world. His previous books include *The Pursuit of Objectivity in Psychology* and *Lacan's Logic of Subjectivity: A Walk on the Graph of Desire*.

Desmet is the author of over one hundred peer-reviewed academic papers. In 2018 he received the Evidence-Based Psychoanalytic Case Study Prize of the Association for Psychoanalytic Psychotherapy, and in 2019 he received the Wim Trijsburg Prize of the Dutch Association of Psychotherapy.

THE PSYCHOLOGY OF TOTALITARIANISM

Totalitarianism is not a coincidence and does not form in a vacuum. It arises from a collective psychosis that has followed a predictable script throughout history, its formation gaining strength and speed with each generation—from the Jacobins to the Nazis and Stalinists—as technology advances. Governments, mass media, and other mechanized forces use fear, loneliness, and isolation to demoralize populations and exert control, persuading large groups of people to act against their own interests, always with destructive results.

This presentation will deconstruct the societal conditions that allow this collective psychosis to take hold. By looking at our current situation and identifying the phenomenon of “mass formation”—a type of collective hypnosis—it will be clearly illustrated how close we are to surrendering to totalitarian regimes.

With detailed analyses, examples, and results from years of research, steps will be discussed that lead toward mass formation, including:

- An overall sense of loneliness and lack of social connections and bonds
- A lack of meaning—unsatisfying jobs that don't offer purpose
- Free-floating anxiety and discontent that arise from loneliness and lack of meaning
- Manifestation of frustration and aggression from anxiety
- Emergence of a consistent narrative from government officials, mass media, etc., that exploits and channels frustration and anxiety

This presentation will offer a sharp critique of the cultural “groupthink” that existed prior to the pandemic and advanced during the COVID crisis. Dangers of our current societal landscape, media consumption, and reliance on manipulative technologies will be explained and simple solutions will be offered—both individual and collective—to prevent the willing sacrifice of our freedoms.

DR. BRET WEINSTEIN

Bret Weinstein has spent two decades advancing the field of evolutionary biology, earning his PhD at the University of Michigan, before teaching at The Evergreen State College for 14 years, from which he resigned his tenured position in 2017. He has developed a new Darwinian framework based on design trade-offs, and made important discoveries regarding the evolution of cancer, senescence and the adaptive significance of moral self-sacrifice. He is currently working to uncover the evolutionary meaning of large-scale patterns in human history, and seeking a game theoretically stable path forward for humanity. With his wife, Heather Heying, he has published *A Hunter-Gatherer's Guide to the 21st Century*, and is the host of the DarkHorse podcast.

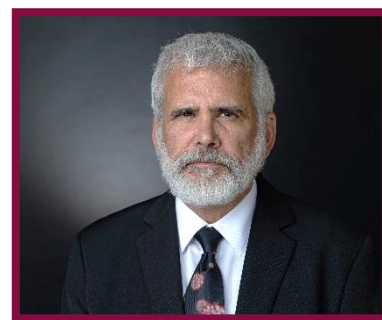

WHAT THE PANDEMIC REVEALED ABOUT THE WORLD WE LIVE IN

The Covid pandemic provides the best opportunity of any story in our lifetimes to understand the landscape of institutional capture that we face, and the jeopardy it creates for the public.

DR. ROBERT MALONE

Dr. Robert Malone is an internationally recognized scientist, physician, author and political commentator. He is the original inventor of mRNA vaccination and DNA vaccination as technology platforms and holds numerous fundamental domestic and foreign patents. He has about 1-- peer-reviewed publications and over 14,000 citations for his work. Dr. Malone has been a thought leader during the COVID era, including bringing attention to the faulty testing and the significant number of adverse events associated with the mRNA vaccines and regulatory capture by the FDA. He has testified against censorship, COVID mandates and for access to early treatment across the world. Dr. Malone is president of the Malone Institute, whose mission is to bring back integrity to government, the biological sciences and medicine. Dr. Malone's substack, "Who is Robert Malone" has 315,000 subscribers and he is featured on many TV broadcasts, podcasts and documentaries. His best-selling book is called "Lies My Gov't Told Me: And the Better Future Coming".

TAKING BACK CONTROL IN THE BETTER FUTURE COMING

Simple truths are what matter most. Honest words can change the world. We each hold the power to spread truth. We all stand on the shoulders of giants who can guide us. I am a physician and a scientist, highly trained and experienced in developing vaccines and other medicines. But I have also been a close observer and objector to the ethical breaches, mismanagement and widespread lies which have characterized public health response to the COVID crisis.

Integrity. Dignity. Community. These three words summarize both what has been damaged during the COVID crisis, and how we can regain control of our personal lives and build a better future for ourselves and our children.

What options do you have when confronting the awesome power of governments, their militaries, their various domestic enforcers and their intelligence service agencies to deploy advanced PsyWar technologies on you, as they seek to cover up their misdeeds and control all information you are able to access, all speech you may wish to share with others, as well as your own personal thoughts, emotions, beliefs and your very soul? It is tempting to play the victim, to go along to get along to just let them have their way with you. To allow them to control you, and to control your future and that of your children. To self-victimize.

How can you prevent yourself from the epidemic disease of self-victimization? How can you prevent Corporate Media, the Administrative State and the Globalists from victimizing you? It begins by recognizing that you, and you alone, choose how to define yourself. You will become what you believe yourself to be.

You have the power of self-determination. You can choose to be a victim, or you can choose to be a warrior, a caregiver, a teacher, a mentor, or one of the many other roles that empower you as an individual. But the path forward to a better future requires that each of us recognize that we have both a choice and an opportunity to personally commit to insisting on calling out lies and acting with integrity, respecting human dignity, and building community.

Remember the words of Aleksandr Solzhenitsyn:

"We know they are lying. They know they are lying. They know that we know they are lying. We know that they know we know they are lying. And still, they continue to lie."
